SOUTH DAKOTA PUBLIC
UTILITIES COMMISSION

Dear PUC Commissioners,

I am adding my voice to those expressing concerns about the Big Stone II power plant. I share their concerns about the carbon dioxide emissions.

As I understand the PUC is responsible for protecting the environment from serious injury by new plants.

Please take your responsibility seriously. Please do not pass the buck by saying it is someone else's responsibility. You are the agency that will or will not grant the permit and set the standards.

Thank you for attention.

Sincerely,
Wesley Weisard
