**RE: In the Matter of the Application of Otter Tail Power Company for a Permit to Construct the two 230-kilovolt lines between Big Stone South Substation and Big Stone Plant Substation
Docket Nos. EL12-063 and EL06-002**

Dear Mr. Rounds,

This letter transmits a copy of the four easements secured for the two 230-kilovolt lines between Big Stone South Substation and Big Stone Plant Substation. The copy of the signed and as yet unrecorded easement from Robert and Constance Loraff adds a few feet at the south end of Easement No. 108958. Otter Tail Power Company needed a slightly wider easement than originally anticipated to accommodate anchors on the structures. Although this additional easement does not constitute a centerline deviation as described in Stipulation Item 2, we are informing you of the change and providing copies of the project easements.

Attached to this letter are copies of all four of the easements secured for this project.

Please let me know if you have any questions with this filing.

Sincerely,

/s/ CINDY KUISMI
