CHOICE OF PEAK PERIODS

Customer may choose one of five optional peak periods and must maintain the choice for a minimum of oneyear. The five on peak periods have the following beginning and ending hours:

Option	Beginning Hour	Ending Hour	Maximum Customer Limitation
4	9:00 a.m.	9:00 p.m.	No Limit
2	9:30 a.m.	9:30 p.m.	500
3	10:00 a.m.	10:00 p.m.	500
4	10:30 a.m.	10:30 p.m.	500
5	11:00 a.m.	11:00 p.m.	500

Off peak hours are times not specified as on peak hours.

One year after initial choice of peak period, customer may change peak period selection. Such change isallowed only once per year and is subject to the Service Processing Charge, as specified in the General Rulesand Regulations, Section 1, GENERAL SERVICE RULES.

OPTIONAL TRIAL SERVICE

Customers may elect time of day service for a trial period of three months. This service is available to a maximum of 100 customers at one time. If a customer chooses to return to non-time of day service after the trial period, the customer will pay a charge of \$20.00 for removal of time of day metering equipment.

TERMS AND CONDITIONS OF SERVICE

- 1. Customer selecting the above time of day schedule will remain on this rate for a period of not less than 12 months, except as provided under Optional Trial Service.
- 2. This schedule is also subject to provisions contained in Rules for Application of Residential Rates.
- 3. Standby and Supplementary Service is available under this rate subject to the provisions of the General Rules and Regulations and as provided for elsewhere in this rate.

RULES FOR APPLICATION OF RESIDENTIAL RATES

Section No. 5 Original-<u>1st Revised</u> Sheet No. 13 Relocated from SDPUC No. 1<u>Cancelling</u> 3-7<u>13</u> Original Sheet No.

- The Residential Service, Residential Service Underground, and Residential Time of Day Service, and Residential Time of Day Service - Underground rates are the only rates available to residential customers for domestic purposes in a single private residence. Energy Controlled Service (Non-Demand Metered), Residential Heat Pump Service (Two Meter Rate), Limited Off Peak Service, and Automatic Protective Lighting Service rate schedules are also available to qualifying residential customers.
- 2. Normal service under the Residential Service, Residential Service Underground, and Residential Time of Day Service, and Residential Time of Day Service Underground rate schedules is single phase service rendered through one meter. Three phase service or service through more than one meter will be provided upon a one-time payment of an amount to reimburse Company for the additional investment, operating, and maintenance costs. If customer is served through more than one meter, each meter will be separately billed.
- 3. Electric space heating charges are applicable only when customer's electric space heating equipment is used as customer's primary heating source.
- 4. The Residential Service Underground and Residential Time of Day Service Underground rate schedules underground charges will apply where the underground facilities are owned by Company and Company has not been fully reimbursed for the added cost of such underground facilities.
- 5. Standby and Supplementary Service is available for any residential customer subject to the provisions in the General Rules and Regulations.
- 6. A customer using electric service for domestic and non-domestic purposes jointly may combine such use through one meter on such rates as are available to General Service customers.
- 7. Every building or portion of building used for residential purposes constructed or materially changed after November 23, 1980, shall be arranged to permit the consumption for each apartment or dwelling unit to be individually metered. An apartment is defined as a portion of a building consisting of one or more rooms completely equipped for living purposes.

TERMS AND CONDITIONS OF SERVICE

- 1. Company shall install a demand meter for a customer when:
 - a. Customer's connected load is estimated to be 20 kW or greater,
 - b. Customer is served single phase and has a service entrance capacity greater than 200 amperes,
 - c. Customer is served three phase at 120/208 or 120/240 volts and has a service entrance capacity greater than 200 amperes,
 - d. Customer is served three phase at 240/480 or 277/480 volts and has a service entrance capacity greater than 100 amperes, or
 - e. Customer's average monthly kWh use for four consecutive months exceeds 3,500 kWh.
- If a demand meter is installed in accordance with the above, the customer may remain on the Small General Service schedule as long as his maximum demand is less than 25 kW. When the customer achieves an actual maximum demand of 25 kW or greater, the customer will be placed on the General Service

SMALL GENERAL TIME OF DAY SERVICE (Continued) RATE CODE E14 (METERED) AND RATE CODE E18 (UNMETERED) Section No. 5 Original <u>1st Revised</u> Sheet No. 24.1 Cancelling Original Sheet No. 24.1

TERMS AND CONDITIONS OF SERVICE (Continued)

- Optional Metering Service: Optional metering is available subject to the provisions in the General Rules and Regulations, Section 1.5, for the following applications:
 - a. Kilowatt-hour Metered Service: For applications where a non-time of day meter is used, the time of day metering charge will be waived and the monthly customer charge for each location is \$7.25\$8.20
 - b. Unmetered Service: For applications where no metering is installed, the monthly customer charge for each location is \$5.95\$6.50. If requested by Company, the customer agrees to receive one or more combined bills for all their unmetered service locations. For purposes of applying the appropriate customer service charge, one customer service charge shall be applied for every point of delivery. A point of delivery shall be any location where a meter would otherwise be required under this schedule.
 - c. Low Wattage Unmetered Service: For applications where customer owns and operates multiple electronic devices in at least 200 locations within Company's South Dakota electric service area. Such electronic devices are: 1) individually located at each point of delivery, 2) rated at less than 400 Watts, and 3) operated with a continuous and constant load level year round. Each individual electronic device must not in any way interfere with Company operations and service to adjacent customers. This optional metering service is not applicable to electric service for traffic signals, civil defense, or lighting. Company reserves the right to evaluate customer requests for this optional metering service to determine eligibility.

The monthly fixed charge under this optional metering service shall be <u>\$0.25\$0.27</u> per device for devices with a rating of 100 Watts or less. For devices with a rating over 100 Watts but less than 400 Watts, the monthly fixed charge shall be <u>\$1.05\$1.10</u> per device. The customer charge shall equal the sum of the fixed charges for customer's low wattage devices in service for the billing month.

In place of metered usage for each device, customer will be billed for the predetermined energy usage in kWh per device. The energy charge shall equal the sum of the predetermined energy usage for customer's low wattage devices in service for the billing month multiplied by the Continuous 24 Hour Energy Charge applicable for the billing month.

Customer shall contract for this optional metering service through an electric service agreement with Company.

PEAK CONTROLLED SERVICE (Continued) RATE CODE E20 Section No. 5 Original-<u>1st Revised</u> Sheet No. 32 Relocated from SDPUC No. 1Cancelling <u>3-40.1 &</u> Original Sheet No. <u>3-40.23</u> 2

DETERMINATION OF DEMAND

Maximum Actual Demand in kW shall be the greatest 15 minute load during the billing month.

<u>Adjusted Demand</u> in kW for billing purposes shall be determined by dividing the maximum actual demand in kW by the power factor expressed in percent but not more than a 90% power factor and multiplying the quotient so obtained by 90% and rounding to the nearest whole kW.

<u>Predetermined Demand</u> shall be specified and agreed to by the customer and Company. Customer's adjusted demand must not exceed the predetermined demand level (PDL) during a control period.

Standard PDL customers must agree to a fixed demand level and limit load to that level during a control period.

Optional PDL customers must agree to reduce demand by a fixed amount during a control period. Customer's PDL will be the monthly adjusted on peak demand less the fixed load reduction. The PDL in months without a control period will not be less than the greatest PDL of all months with a control period during the preceding 11 months.

<u>Firm Demand</u> for the billing month shall be the lesser of predetermined demand or adjusted demand, except in months when customer fails to control load to predetermined demand level when requested by Company. In these months, firm demand shall be the adjusted demand established during the control period.

<u>Controllable Demand</u> shall be the difference between customer's adjusted demand during the billing month and the greater of predetermined demand or firm demand, but never less than zero.

Minimum Demand to be billed each month shall not be less than the current month's adjusted demand in kW.

POWER FACTOR

The power factor for the month shall be determined by permanently installed metering equipment.

ANNUAL MINIMUM DEMAND CHARGE

The annual minimum demand charge shall be no less than \$46.00\$50.50 per kW times the predetermined demand, plus \$27.00\$32.00 per kW times the expected maximum controllable demand.

PEAK CONTROLLED TIME OF DAY SERVICE (Continued) RATE CODE E21 Section No. 5 <u>2nd-3rd</u> Revised Sheet No. 35 Cancelling <u>1st-2nd</u> Revised Sheet No. 35

FUEL CLAUSE

Bills subject to the adjustment provided for in Fuel Clause Rider.

OTHER RIDERS

Bills are subject to the adjustments provided for in the Transmission Cost Recovery Rider and Environmental Cost Recovery Rider.

LATE PAYMENT CHARGE

A late payment charge of 1% of the unpaid balance will be added to the next month's bill after the date due.

DEFINITION OF PEAK PERIODS

The on peak period is defined as those hours between 9:00 a.m. and 9:00 p.m. The on peak hours occurs Monday through Friday, except the following holidays: New Year's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. When a designated holiday occurs on Saturday, the preceding Friday will be designated a holiday. When a designated holiday occurs on Sunday, the following Monday will be designated a holiday. The off peak period is defined as all other hours. Definition of on peak and off peak period is subject to change with change in Company's system operating characteristics.

DETERMINATION OF DEMAND

<u>Actual On Peak Period Demand</u> in kW shall be the greatest 15 minute load for the on peak period during the billing month.

<u>Adjusted On Peak Period Demand</u> in kW for billing purposes shall be determined by dividing the actual on peak demand by the power factor expressed in percent but not more than 90%, multiplying the quotient so obtained by 90%, and rounding to the nearest whole kW.

<u>Actual Off Peak Period Demand</u> in kW shall be the greatest 15 minute load for the off peak period during the billing month rounded to the nearest whole kW. In no month shall the off peak period demand for billing purposes be considered as less than the current month's actual off peak period demand in kW.

<u>Off Peak Period Demand in Excess of On Peak Period Demand</u> in kW to be billed shall be determined by subtracting the billing on peak period demand from the actual off peak period demand only if the off peak period demand is greater.

PEAK CONTROLLED TIME OF DAY SERVICE (Continued) RATE CODE E21 Section No. 5 Original-<u>1st Revised</u> Sheet No. 36 Relocated from SDPUC No. 1Cancelling <u>3-40.4 &</u> Original Sheet No. <u>3-40.53</u> 6

DETERMINATION OF DEMAND (Continued)

<u>Predetermined Demand</u> shall be specified and agreed to by the customer and Company. Customer's adjusted on peak demand must not exceed the predetermined demand level (PDL) during a control period.

Standard PDL customers must agree to a fixed demand level and limit load to that level during a control period.

Optional PDL customers must agree to reduce demand by a fixed amount during a control period. Customer's PDL will be the monthly adjusted on peak demand less the fixed load reduction. The PDL in months without a control period will not be less that the greatest PDL of all months with a control period during the preceding 11 months.

<u>Firm Demand</u> for the billing month shall be the lesser of predetermined demand or adjusted on peak period demand, except in months when customer fails to control load to predetermined demand level when requested by Company. In these months, firm demand shall be the adjusted on peak period demand established during the control period.

<u>Controllable Demand</u> shall be the difference between customer's adjusted on peak period demand during the billing month and the greater of predetermined demand or firm demand, but never less than zero.

<u>Minimum On Peak Demand</u> to be billed each month shall not be less than the current month's adjusted on peak period demand in kW.

POWER FACTOR

The power factor for the month shall be determined by permanently installed metering equipment.

ANNUAL MINIMUM DEMAND CHARGE

The annual minimum demand charge shall be no less than <u>\$46.00</u> per kW times the predetermined demand, plus <u>\$27.00</u> and per kW times the expected contracted maximum controllable demand.

OTHER PROVISIONS

Peak Controlled Time of Day Service is also subject to provisions contained in Rules for Application of Peak Controlled Service.

RULES FOR APPLICATION OF PEAK CONTROLLED SERVICE (Continued)

Section No. 5 Original-<u>1st Revised</u> Sheet No. 39 Relocated from SDPUC No. 1<u>Cancelling</u> 3-41-& <u>Original</u> Sheet No. 3-41.13 9

- 8. Minimum controllable demand during the Company's peak season shall be 50 kW.
- 9. Company shall not be liable for any loss or damage caused by or resulting from any interruption of service.
- 10. Company will determine, at a service location designated by Company, the number of services supplied. Customers requesting special facilities will be charged the additional costs incurred for such facilities.
- 11. Customers choosing the predetermined demand level option requiring a fixed demand reduction will be subject to an additional charge for metering and billing when additional metering equipment is necessary. The additional charge is \$11.00\$12.00 per month for an application using a single meter in close proximity to customer's service point. The additional charge for more complex applications will be based on the actual costs of the specific application.
- 12. Company will maintain firm demand charge rates for Peak Controlled Service and Peak Controlled Time of Day Service at the General Service and General Time of Day Service levels, respectively.
- 13. Any customer with generating equipment which is operated in parallel with Company must comply with all requirements associated with parallel operations as specified in the General Rules and Regulations of the Company.
- 14. Any load served by customer generation during Company requested control periods must be served by Company at all other times.

The annual minimum demand charge shall be no less than <u>\$46.00</u> per kW times the predetermined demand, plus <u>\$26.00</u> per kW times the expected maximum controllable demand.

TERMS AND CONDITIONS OF SERVICE

- 1. Alternating current service is provided at the following nominal voltages:
 - a. Secondary Voltage: Single or three phase from 208 volts up to but not including 2,400 volts,
 - b. Primary Voltage: Three phase from 2,400 volts up to but not including 69,000 volts,
 - c. Transmission Transformed Voltage: Three phase from 2,400 volts up to but not including 69,000 volts, where service is provided at the Company's disconnecting means of a distribution substation transformer, or
 - d. Transmission Voltage: Three phase at 69,000 volts or higher.

Service voltage available in any given case is dependent upon voltage and capacity of Company lines in vicinity of customer's premises.

2. Transmission Transformed Service is available only to customers served by an exclusively dedicated distribution feeder. Customer will be responsible for the cost of all facilities necessary to interconnect at the Company's disconnecting means of a distribution substation transformer.

RULES FOR APPLICATION OF STREET LIGHTING RATES

Section No. 5 Original <u>1st Revised</u> Sheet No. 60 Relocated from SDPUC No. 1<u>Cancelling</u> 3-4960 Original Sheet No.

1. SERVICE INCLUDED IN RATE

a. Leased Equipment

Company shall own, operate, and maintain the overhead and underground street lighting systems using Company's standard street lighting equipment.

b. Purchased Equipment

Group I

Company shall furnish all electric energy necessary to operate customer's ornamental street lighting system, shall make all lamp and globe renewals, clean the globes, light and extinguish all lamps, make all ballast renewals, and furnish all the materials and labor necessary therefor.

Where customer receives painting of metal standards service in lieu of ballast renewals (closed option), the monthly rate shall be reduced by \$0.25 for each additional luminaire mounted on a single standard.

Group II (Ballglobe or luminaires with nonstandard ballast)

Company shall furnish all electric energy necessary to operate customer's ornamental street lightingsystem, shall make all lamp renewals, clean the globes, light and extinguish all lamps, and furnish allthe materials and labor necessary therefor.-

Group III (Customer furnishes glassware and ballast)

Company shall furnish all electric energy necessary to operate customer's ornamental street lightingsystem, shall make all lamp renewals, clean the globes, light and extinguish all lamps, and furnish allthe materials and labor necessary therefor. Customer shall furnish and stock glassware and ballast; Company shall furnish replacement labor.-

Group IV

The customer owns and maintains entire ornamental street lighting system including underground cables, posts, lamps, ballasts, glassware, and photocells conforming to specified daily operating schedule. Company furnishes energy only at central distribution points designated by Company. See individual street lighting contracts for terms and conditions not covered herein.

Ī

FIRE AND CIVIL DEFENSE SIREN SERVICE RATE CODE E40

Section No. 5 Original <u>1st Revised</u> Sheet No. 63 Relocated from SDPUC No. 1<u>Cancelling</u> 3-5363 Original</u> Sheet No.

AVAILABILITY

Available for power service for the operation of municipal fire and civil defense warning sirens having a rated capacity not in excess of 25 horsepower.

RATE

Per Month per Horsepower of Connected Capacity \$0.52\$0.57

MINIMUM BILL

Net per Month \$2.55\$2.81

LATE PAYMENT CHARGE

A late payment charge of 1% of the unpaid balance will be added to the next month's bill after the date due.

CONNECTION

Under the above rate, the Company will make no extension for service other than a normal service span. Where conditions are such that a long service connection or extra transformer capacity, or both, are necessary, the customer shall either pay the entire cost of such extra equipment or pay a monthly facilities charge based on such costs.

The circuit serving the siren must be in conduit from the entrance to the motor with an enclosed entrance switch box, which may be sealed and operated from an external appliance.

OPTIONAL

In case the customer already has a service connection of sufficient capacity to permit operation of the siren without unduly disturbing conditions on the Company's nearby circuits, the siren may be connected at the option of the customer on the lead side of the customer's existing meter and the commercial rate applied to the total load.

FUEL CLAUSE RIDER

Section No. 5

3rd 4th Revised Sheet No. 64

Cancelling 2nd-3rd Revised Sheet No. 64

There shall be added to or deducted from the net monthly bill \$0.00001 per kilowatt-hour for each \$0.00001					
increase above or decrease below \$0.01092 in the fuel cost per kilowatt-hour sales.					
The fuel cost shall be the sum of the following for the most recent two month period plus unrecovered (or less over recovered) prior cumulative energy costs:					
1.The fossil and nuclear fuel consumed in the Company's generating stations as recorded in Accounts 151 and 518.					
2.The net energy cost of energy purchases as recorded in Account 555 exclusive of capacity or demand charges, when such energy is purchased on an economic dispatch basis. Account 555 includes hedging program gains, losses and transaction costs related to system supply, pursuant to Decket No. EL99-021.					
3. The actual identifiable fossil and nuclear fuel costs associated with energy purchased for reasons other than identified in (2) above, less					
4.The fuel related costs recovered through intersystem sales.					
 5.Net costs or revenues recorded in Accounts 456, 501 and 555 (and other appropriate accounts as determined by the Commission) linked to the Company's load serving obligation, associated with participation in wholesale electric energy and ancillary service markets operated by Regional Transmission Organizations, Independent System Operators or similar entities that have received Federal Energy Regulatory Commission approval to operate the energy markets. 					
The kilowatt-hour sales shall be all kilowatt-hours sold excluding intersystem sales for the same period.					
A carrying charge or credit will be included in the determination of monthly fuel adjustment factors. Said charge or credit will be determined by applying one-twelfth of the overall rate of return granted by the South Dakota Public Utilities Commission in the most recent rate decision to the recorded balance of deferred fuel cost as of the end of the month immediately preceding the fuel adjustment factor determination. FUEL CLAUSE CHARGE There shall be added to or deducted from the monthly bill a Fuel Cost Charge calculated by multiplying the applicable monthly billing kilowatt hours (kWh) by the billed Fuel Adjustment Factor (FAF) per kWh. The billed FAF is calculated by prorating each calendar month FAF by the number of customer billing days in each calendar month, and rounding to the nearest \$0.00001 per kWh.					
EXEMPTION For customers participating in Company's Windsource Energy Rider, the applicable billing kWh subject to the FAF shall be reduced by the amount of the energy in the subscribed Renewable Energy blocks. In the event

Section No. 5

FUEL CLAUSE RIDER (Continued)

Section No. 5 Original Sheet No. 64.1

CURRENT PERIOD COST OF ENERGY

The current period cost of energy shall be sum of the following qualifying costs for the most recent two month period, divided by the kWh sales for the same period, excluding Intersystem sales and Windsource Energy Rider sales.

- 1. The fossil and nuclear fuel consumed in the Company's generating stations as recorded in Federal Energy Regulatory Commission (FERC) Accounts 151 and 518.
- 2. The net energy cost of energy purchases as recorded in FERC Account 555 exclusive of capacity or demand charges, when such energy is purchased on an economic dispatch basis. FERC Account 555 includes hedging program gains, losses and transaction costs related to system supply, pursuant to Docket No. EL99-021.
- 3. The actual identifiable fossil and nuclear fuel costs associated with energy purchased for reasons other than identified in (2) above.
- 4. Net costs or revenues recorded in Accounts 456, 501 and 555 (and other appropriate accounts as determined by the Commission) linked to the Company's load serving obligation, associated with participation in wholesale electric energy and ancillary service markets operated by Regional Transmission Organizations, Independent System Operators or similar entities that have received Federal Energy Regulatory Commission approval to operate the energy markets.
- 5. Less the fuel related costs recovered through intersystem sales.
- 6. Less purchased energy costs for the Renewable Energy Rider program.

FUEL COST TRUE-UP FACTOR

The Fuel Cost True-up Factor is the cumulative balance of unrecovered qualifying system energy and MISO costs from prior months divided by the South Dakota retail kWh sales for the most recent period. A carrying charge or credit will be included in the determination of the Fuel Cost True-Up Factor. Said charge or credit will be determined by applying one-twelfth of the overall rate of return granted by the South Dakota Public Utilities Commission in the most recent rate decision to the recorded balance of deferred fuel cost as of the end of the month immediately preceding the fuel adjustment factor determination.

INTERSYSTEM SALES MARGINS

Intersystem Sales Margins are defined as intersystem sales revenues less the sum of fuel, energy costs (including costs associated with MISO markets that are recorded in FERC Account 555), and any additional transmission costs incurred that are required to make such sales (referred to as "margins"). Retail customers will receive a per kWh credit for the retail share of total intersystem sales margins, as defined below:

- 1. Asset Based Margins: One hundred percent (100%) of the South Dakota state jurisdictional share of margins from asset based intersystem energy sales and ancillary services. These margins shall be the actual amounts of such margins recorded, subject to any MISO resettlements.
- 2. Non-Asset Based Margins: Twenty five percent (25%) of the South Dakota state jurisdictional share of non-asset based margins from intersystem sales. These margins shall be the actual amounts of such margins recorded, subject to the FERC approved Joint Operating Agreement and any MISO resettlements. The retail share of the Non-Asset Based Margins will be calculated annually after the close of the calendar year, and will be credited to the Fuel Cost True-up Factor only if calendar year margins are positive.

RESIDENTIAL CONTROLLED AIR CONDITIONING AND WATER HEATING RIDER

Section No. 5 <u>1st-2nd</u> Revised Sheet No. 66 Cancelling Original 1st Revised Sheet No. 66

AVAILABILITY

Available to Residential Service and Residential Service - Underground customers with:

- 1. Company controlled central air conditioning, or
- 2. Company controlled heat pumps receiving Energy Controlled Service (Non-Demand Metered) with optional non-interruptible service during June through September.

Company controlled electric water heating is also available to residential customers with a controlled central air conditioner or heat pump, with the exception of electric water heaters served with the Energy Controlled Service (Non-Demand Metered) rate schedule.

RIDER

Residential Central Air Conditioning

A 15% discount will apply to the energy and Fuel Clause Rider charges up to a maximum of 4,000 kWh per month during the billing months of June through September.

Residential Electric Water Heating

A 2% discount will apply to energy and Fuel Clause Rider charges up to a maximum of 4,000 kWh per month during each billing month provided total energy use is not less than 300 kWh.

TERMS AND CONDITIONS

- 1. The duration and frequency of interruptions will be determined by the Company. Air conditioning will be cycled on a schedule of 15 minutes on and 15 minutes off in any 30 minute portion of a load management period. Air conditioning interruptions will normally occur on high demand days during summer months. Water heating interruptions will normally occur on high demand days during summer and winter months. Interruption will normally be based on meeting peak demands and system economic dispatch requirements of Company. However, interruption may also occur at times when, in the Company's opinion, the reliability of the system may be at risk. Air conditioning and water heating interruptions will normally occur during the observation day of the following holidays: New Year's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.
- 2. Company shall not be liable for any loss or damage caused by or resulting from any interruption of service.

STANDBY SERVICE RIDER

Section No.	5
Original <u>1st Revised</u> Sheet No.	68
Relocated from SDPUC No. 1Cancelling	3-43.
Original Sheet No.	8

AVAILABILITY

Available to any General Service or General Time of Day Service customer subject to the provisions in the General Rules and Regulations, Section 2.4.

RATE

	Unscheduled	Scheduled
	Maintenance	Maintenance
Customer Charge per Month	\$25.00	\$25.00
Demand Charge per Month per kW of Contracted		
Standby Capacity		
Secondary Voltage Service	\$2.85 <u>\$2.90</u>	<u>\$2.75\$2.80</u>
Primary Voltage Service	\$2.05 <u>\$2.10</u>	\$1.95_<u>\$2.00</u>

Transmission Voltage Service	\$0.80 <u>\$0.90</u>	\$0.70 <u>\$0.80</u>

TERMS AND CONDITIONS OF SERVICE

- 1. Standby Service Rider will apply to any customer who requires 100 kW or more of standby capacity from Company.
- 2. Customer will execute an Electric Service Agreement with Company which will specify:
 - a. The total capacity requirements which will be no less than that which Company will be required to supply in the event customer's power source is not available, and
 - b. Capacity of customer's power source for which Company will be providing standby power and to which the Standby Service charge applies.
- 3. The Company's meter will be ratcheted to measure the flow of power and energy from Company to customer only.
- 4. Company will not be obligated to supply a customer's load in excess of the capacity for which customer has contracted.
- 5. Customer will be liable for all damages caused by customer's use of power in excess of contracted for capacity.

Section No. 5 Original Sheet No. 73

AVAILABILITY

Available to any customer who agrees to pay the additional rate specified below for the customer's elected Windsource purchases. The resulting Windsource revenue helps cover the incremental costs of renewable energy, such as wind, solar and biogas, whether owned by Xcel Energy or a third party.

RATE

A charge of **<u>\$3.60</u>** will be added to the customer's standard retail bill for every 100 kWh block of usage under this Rider. A customer must elect to purchase Windsource energy either in blocks of 100 kWh or for their entire monthly usage.

Windsource usage is exempt from the Fuel Clause Rider charge but is subject to any other applicable adjustments and surcharges, including city surcharge and sales tax. This service will appear on the bill as "Windsource Program."

TERMS AND CONDITIONS OF SERVICE

- 1. The minimum subscription to be billed each month is one 100 kWh block. The minimum subscription periods are one year for residential customers and three years for non-residential customers. After the minimum period, a customer will continue purchasing Windsource energy on a month-to-month basis until the customer terminates the subscription after providing the Company with a 30-day notice.
- 2. Upon a customer's special request, the Company may allow a one-time, event-specific Windsource subscription for a convention, concert, sporting event, trade show or similar event.
- 3. In the event a customer's actual, metered consumption under this Rider is not a multiple of 100 kWh, the charge for the last, partial block will be prorated accordingly.
- 4. For customers on time of day tariffs, their Windsource usage shall be assigned to the on-peak and off-peak periods in proportion to the annual class on-peak / off-peak sales ratio.
- 5. The billing discounts associated with Residential Controlled Air Conditioning and Water Heating Rider and Commercial and Industrial Controlled Air Conditioning Rider do not apply to the charges under this Rider.
- 6. The Company will maintain a cost and revenue tracker account for this program and will report its balance to the Commission each October 11th, beginning in 2011. The Company will use the tracker balance as a basis for periodic requests to update the Windsource rate, to assure full and accurate cost recovery.

GENERAL RULES AND REGULATIONS

- Section No. 6
- Original 1st Revised Sheet No.
- Relocated from SDPUC No. 1Cancelling 5-23 Original Sheet No.

SECTION 1 GENERAL SERVICE RULES

1.1 APPLICATION FOR SERVICE

A party desiring electric service must make application to the Company before commencing the use of the Company's service. The Company reserves the right to require a signed application or written contract for service to be furnished. All applications and contracts for service must be made in the legal name of the party desiring the service. The Company may refuse <u>an applicant</u> or terminate service to <u>a customer any applicant</u> for or user of service who fails or refuses to furnish information requested by the Company for the establishment of a service account. <u>Any person who uses Receipt and use of</u> electric service in the absence of application or contract shall constitute the user a customer of the <u>be</u> subject to the <u>Company Company's</u> subject to its rates, rules, and regulations, and said user shall be responsible for payment of all service used.

The Company shall provide an explanation of all charges and options available to customers through its rate folders, customer information booklets, and service forms.

When required by governmental authority, a customer desiring new service or expanded service must first make application for and receive written approval from the Company.

Subject to its rates, rules, and regulations, the Company will continue to supply electric service until notified by customer to discontinue such the service. The customer will be responsible for payment of all service furnished to through the date of such the discontinuance.

1.2 SERVICE PROCESSING CHARGES

Α.	Service Processing Charge
	The Company will assess a \$12.00 processing charge for the initial establishment of service for each
	customer.
В.	Service Reconnection Charge
	The Company will charge \$22.50 for reconnecting service that has been disconnected for non-payment.

 C.
 Service Relock Charge

 The Company will charge \$100.00 for reconnecting service where the Company has disconnected service

 for non-payment and subsequently returned to relock the service after it was reconnected without

 Company authorization.

If a customer requests reconnection of service at a location where the same customer discontinued the same

1.5 OPTIONAL METERING SERVICE

Α. General Rule

The Company will provide optional metering service to eligible customers subject to the provisions in this section and all Terms and Conditions shown on the applicable rate schedule. Optional metering service will not be provided at any location where the customer is provided with fully metered service. A customer cannot divide a fully metered service so that a portion of the service could qualify for optional metering service. The Company reserves the right at any time to fully meter service previously supplied on an optional metering basis.

Β. Service Availability

A customer is eligible for optional metering service so long as all of the following conditions are met:

- 1. The customer's utilization equipment has a total rated capacity of 10-250 kW or less and an estimated usage of 2,500186,000 kWh or less per month.
- 2. The customer's utilization equipment has a definitely determinable demand which has verifiable limits.
- 3. The customer's utilization equipment is operated on a fixed schedule. A fixed schedule is:
 - a continuous non-discretionary 24 hour usage, or a.
 - b. a photocell-controlled, sunset to sunrise, usage referred to as an hours of darkness (HOD) schedule.
- 4. The customer's utilization equipment can be readily and efficiently inspected by the Company to verify its usage. The usage may be verified by one or more of the following:
 - the nameplate rating, a.
 - totalizing the load for the number of ballast-controlled high intensity discharge lamps, or b.
 - the use of a kilowatt-hour or other type of meter. c.

C. **Optional Unmetered Service**

The Company will provide optional unmetered service to customers meeting the eligibility requirements. Usage for billing will be determined by the Company and agreed to by the customer upon a contract for service.

Section No. 6 Original 1st Revised Sheet No. 5 Relocated from SDPUC No. 1Cancelling 5-35

Original Sheet No.

1.5 OPTIONAL METERING SERVICE (Continued)

D. Optional Time of Day Metering Service

> The Company will provide optional time of day metering service to customers meeting the eligibility requirements. The time of day metering charge will be waived for customers eligible for this optional service. Time of day billing will be accomplished through a usage schedule which accounts for the number of hours of usage occurring in the on peak and off peak periods. Optional time of day metering service will be provided under one of the following methods:

- 1. Totally Unmetered Service. Usage for billing will be determined by the Company and agreed to by the customer upon a contract for service.
- 2. Kilowatt-Hour Metered Service. Usage for billing will be determined from meter readings.

1.6 DEPOSITS AND GUARANTEES

Any applicant or customer who has not established good credit as defined by the SDPUC rules may be requiredto deposit a sum not to exceed one-sixth of the estimated annual bill, as determined by the Company. The-Company will pay 7% simple interest per annum on deposits so made, said interest to be paid annually by direct payment or as a credit on the customer's bill, at the option of the Company. The Company will refund a customer's deposit after 12 consecutive months of prompt payment. If a customer's credit standing becomesunsatisfactory after a deposit has been refunded or if the deposit is inadequate to cover one-sixth of the estimated annual bill, a new or additional deposit may be required upon reasonable written notice by the-Company, Deposits will not be considered as advance payments on account. Service to a customer who fails to comply with these requirements may be discontinued upon reasonable written notice.

Upon notice by a customer to discontinue service, the customer's deposit, less any amounts due by the customer to the Company for electric service, will be returned to that customer within 45 days of the date of discontinuanceof service. In lieu of cash deposit, a guarantee satisfactory to the Company for a like amount will be acceptable.

In case of discontinuance of service for non-payment of amounts payable when due, the Company will notrestore service until all arrears are paid in full and a cash deposit as required above is made, or until othersatisfactory credit arrangement is made.

A. General: Any applicant or customer who has not established good credit as defined by the Commission rules may be required to make a deposit to ensure payment before making a service connection.

B. New Service: The Company may require an applicant for service to make a deposit sufficient to cover the estimated charge for furnishing service. If a deposit is required, the Company shall issue a receipt to the depositor showing the amount of the deposit, the date the deposit was made, and the depositor's name.

C. Existing Service: The Company may require a deposit from an existing customer before reconnection is made due to disconnection for nonpayment of a bill. The Company may require a deposit if all or part of the previous deposit was used in settlement of the delinquent bill.

Section No. 6 Original <u>1st Revised</u> Sheet No. 5

Relocated from SDPUC No. 1Cancelling 5-35 Original Sheet No.

D. Deposit Amount: If a deposit is required, the amount of the deposit shall cover the estimated charge for furnishing service to the customer for a sixty-day period.

E. Payment Guarantee Permissible: In lieu of a cash deposit, a guarantee satisfactory to the Company for a like amount will be acceptable. The Payment Guarantee will terminate when the customer gives notice to discontinue service, there is a change in the location covered by the Payment Guarantee, or sixty days after the Guarantor makes a written request to the Company for termination, or thirty days after the customer has paid their bills for twelve consecutive months without having service disconnected for nonpayment and without receiving three or more disconnection notices.

The Company may require a new Payment Guarantee or cash deposit after termination of a Payment Guarantee.

F. Interest on Deposits and Refunds: On such customer deposits, the Company will pay interest at the rate of seven percent simple interest per annum. The Company will pay interest annually by direct payment or as a credit on the customer's bill, at the option of the Company. The payment or deduction for interest must be made during each calendar year, or whenever a deposit is refunded or service discontinued.

<u>G.</u> Refund of Deposits: The Company will refund the deposit plus accrued interest to the customer if the customer has paid their bills for twelve consecutive months without having service disconnected for nonpayment and without receiving three or more disconnections notices.

H. Additional Requirements: If a customer's credit standing becomes unsatisfactory after a deposit has been refunded or if the deposit is inadequate to cover 60 days of the estimated annual bill, a new or additional deposit may be required upon reasonable written notice by the Company. Deposits will not be considered advance payments on account. Service to a customer who fails to comply with these requirements may be discontinued upon reasonable written notice.

In case of discontinuance of service or non-payment of amounts payable when due, the Company will not restore service until all arrears are paid in full and a cash deposit as required above is made, or until other satisfactory credit arrangement is made.

1.7 TROUBLE SERVICE CALLS

When a customer calls and reports an electrical problem, the Company will, as soon as reasonably possible, send out <u>a servicemanservice personnel</u> to determine the necessary action to correct the problem.

If the electrical problem is in the customer's facilities, the <u>serviceman service personnel</u> will attempt to restore service <u>if he can do so</u> by fuse replacement or minor temporary repair. The customer will be charged for all <u>related costs including labor and all</u> materials furnished in <u>addition to the applicable labor charges set forth in-this section</u>.

<u>Charges per Trip per Person</u>	Normal Hours	Overtime Hours
Minimum charge (15 minutes or less)	\$23.00	\$31.50
Time charge per each five minutes on- customer's premises over 15 minutes-	\$3.30	\$4.50
Charge for delivery of materials only-	\$13.00	\$18.00

If the electrical problem is in the Company's facilities or if the electrical problem is of the following nature, repairs thereof will be made as soon as reasonably possible, and the Company will waive any of such charges:

A. Voltage measurement is the only service rendered.

SECTION 2 RATE APPLICATION

2.1 CLASSIFICATION OF CUSTOMERS

For rate application:

A. Residential Customer

A residential customer is one using electric service for domestic-general household purposes in space occupied as living quarters such as single private residences, single apartments, duplex units, townhouseunits, condominium units, apartment units, mobile homes, fraternity houses, sorority houses, and roominghouses.and for garages or other auxiliary buildings on the same premises used by the residential customer. Domestic-General household purposes or uses are domestic lighting, heating, cooking, and power service.

B. Farm Customer

A farm customer is one using electric service for the production of income for agricultural pursuits such as gardening, dairying, egg production, or raising of crops, livestock, or poultry. A farm customer taking electric service for non-domestic-general household purposes only may be considered a general service customer for rate application purposes. A farm customer using electric service for domestic-general household purposes jointly may combine such uses through one meter on such rates as are available to general service customers or farm customers. However, where such use is combined and the non-domestic-general household electric equipment totals less than one kilowatt of connected load, such farm customer shall be classified residential. Where electric equipment is used jointly for domestic-general household and non-domestic-general household and non-domestic-general household on non-domestic-general household and non-domestic-general household on non-domestic-general household on non-domestic-general household and non-domestic-general household purposes (such as a water pump), the major use of such equipment will determine whether it is classified for domestic-general household uses.

C. <u>General Service (Commercial) Customer</u>

A general service customer is one using electric service for any non-domesticgeneral household purpose_ in space occupied and operated for commercial purposes, such as stores, offices, shops, hotels, garages, wholesale houses, filling stations, barber shops, beauty shops, and any other space occupied for commercial purposes. Hotels, greenhouses, nurseries, and kennels are specifically included in thisclassification.

<u>D.</u> Small Commercial and Industrial Customer
 A Small Commercial and Industrial Customer has an actual demand less than or equal to 100 kW.

Original Sheet No. 5-69

2.2 AVAILABILITY OF SERVICE UNDER RATE SCHEDULES

Availability of a rate schedule with respect to the purpose for which service thereunder may be used and the class or classes of customers to which the schedule applies shall be as specified in the rate schedule. Rate schedules are applicable to alternating current service only.

Availability of service under a rate schedule at any particular location in a community or territory where the schedule is shown to be effective, and the kind of current, capacity, voltage, phase, and frequency which the Company holds itself out to supply, depends upon the proximity of the particular location to adequate Company facilities. The extent to which the Company will extend, enlarge, or change its facilities to supply service is determined by Section 5, STANDARD INSTALLATION AND EXTENSION RULES. In areas served by the Company's alternating current, low voltage network systems, all new customers and any customers desiring to change the voltage or type of service will be supplied only alternating current at available secondary voltage.

2.3 CHOICE OF OPTIONAL RATES

When more than one rate schedule is available for the same class of service as indicated by the complete copy of the Company's rates open to public inspection in the Company's office, the Company will assist the customer in the selection of the rate schedule or schedules that, in its judgment, will result in the lowest cost of projected consumption, based on twelve (12) months' service and on the information at hand. New customers may change to another rate schedule after a reasonable trial of the rate schedule originally designated. The Company may not be required to change move a customer's service to a different a rate schedule for any customer after a change more often than once in 12-twelve months unless the rates are changed, there is a material change in the customer's load, or another change, or changes, become is necessary as a result of an order issued by the Public Utilities Commission or a court having jurisdiction. The Company will not be required to make any change in a fixed term contract except as provided therein.

2.4 STANDBY, SUPPLEMENTARY, EMERGENCY, AND INCIDENTAL SERVICES

Unless otherwise specifically provided, the Company's rate schedules require that the customer's <u>will take his</u> entire electrical requirements <u>be received</u> from the Company. The Company's service is not available for standby, supplementary, emergency, or incidental service with respect to any other source of power except when contracted for under a rate schedule providing for these services.

Т

I I

Section No. 6

Original-<u>1st Revised</u> Sheet No. 10 Relocated from SDPUC No. 1<u>Cancelling</u> 5-610 Original Sheet No.

2.4 STANDBY, SUPPLEMENTARY, EMERGENCY, AND INCIDENTAL SERVICES (Continued)

A. <u>Definitions</u>

- 1. <u>Standby Service</u> is defined as service continuously available on a firm (scheduled or unscheduled) basis or non-firm basis through a permanent connection to supply replacement electric energy and power when the customer's normal source of electric energy supply is not available. provide power and energy for use by a customer in case of failure of another mechanical or electrical source of power.
- 2. Supplementary Service is defined as service continuously available through a permanent connection to supplement or augment directly or indirectly another independent source of power.
- 3. *Emergency Service* is defined as service supplied through a temporary connection <u>when for</u> the customer's <u>use when his</u>-usual source of supply has failed.
- 4. Incidental Service is defined as service continuously available through a permanent connection to provide power and energy for use by customer where such use is merely incidental to customer's operations and essentially for his convenience; e.g., (without limiting the generality of the foregoing) for voltage or frequency control, for partial lighting of selected or limited areas, or for operation of controls, battery chargers, starting devices, electric clocks, or other equipment requiring relatively small quantities of energy as compared with customer's total energy usage.

B. <u>Standby and Supplementary Service</u>

The Company will provide Standby and Supplementary Service subject to the following provisions:

- 1. The customer will contract for capacity adequate to supply the entire electrical requirements for which the Company's service may be used. Contracted for capacity will be no less than the Company will be required to supply in case of customer equipment malfunction.
- 2. The Company will not be obligated to supply a customer's load in excess of the capacity for which that customer has contracted.
- 3. The customer will be liable for all damages caused by customer's use of power in excess of its contracted for capacity.
- 4. The Company will require a customer to contract for additional standby and supplementary capacity if the customer exceeds his contract amount in any three of the preceding 12 months.

2.4 STANDBY, SUPPLEMENTARY, EMERGENCY, AND INCIDENTAL SERVICES (Continued)

C. Parallel Operations

If a customer has an independent source of power that will be operated in parallel with the Company's system, such source of power must be operated as provided below. Any customer who operates their facility in non-compliance with these provisions will be subject to discontinuance of service.

- No customer may connect an independent source of power in parallel with the Company's system without prior written consent of the Company. Any customer desiring to generate in parallel shall execute a contract with the Company that contains terms and provisions regarding metering, billing, technical, and operating parameters for the customer's independent source of power.
- 2. The interconnection of customer's facilities with the Company's system shall not interfere with the quality of the Company's service to any of its other customers.
- 3. The customer will provide the necessary equipment as approved by the Company to enable the customer to operate <u>his customer's</u> independent source of power in parallel with Company's system. <u>The customer shall not energize a de-energized portion of the Company's system without permission from the Company.</u> The customer's independent source of power will be designed so that the interconnection circuit breaker or load-break switch between the Company and the customer will open under the following conditions:
 - a. deenergized Company system,
 - b. sustained line faults on Company's system, and
 - c. faults on customer's system.

_A customer shall consult with the Company regarding these minimum requirements, additional protection recommended, proper operation of interconnect circuit breaker or load-break switch, and customer's independent source of power disconnecting device.

- 4. Since the power factor and the voltage at which the Company's system and a customer's system are operated will vary, each party agrees to operate <u>his_its</u> system at a power factor as near unity as possible, or other mutually agreed upon power factor level, in such manner as to absorb his control its share of the reactive power, and voltage as conducive to the best operating standards.
- 5. The Company reserves the right to discontinue service if continued parallel operation by the customer results in trouble on the Company's system, such as interruptions, ground faults, radio or telephone

PROPOSED

Original-<u>1st Revised</u> Sheet No. 14 Relocated from SDPUC No. 1Cancelling 5-8 &

Original Sheet No. 5-914

3.3 MONTHLY BILLING

Bills will normally be rendered monthly and may be paid by mail, or at the office of the Company, or to its duly authorized agents during regular business hours. A "month", as used for billing purposes, does not mean a calendar month, but means the interval between two consecutive periodic meter reading dates which are, as nearly as practicable, at 30 day intervals. The Company may read certain meters less frequently than once each billing month for customers under the Company's self-meter reading procedure, or when the Company and customers otherwise mutually agree, except that a Company representative will read the meter at least once each 12 months. If the billing period is longer or shorter than the normal billing period by more than five days, the bill shall be prorated on a daily basis except for the November, December, and January billing periods when the bill shall be prorated on a daily basis whenever the billing period is less than 25 days or more than 40 days.

3.4 BUDGET HELPER PLAN

Qualified customers may, at their request, be billed under the Company's budget helper plan. Such plan shall provide for 11 equal monthly payments based on the customer's previous use. The billing for the twelfth month will reflect the actual billing for that month adjusted for the credit or debit balance carried forward from the previous month. The Company will review the account during the budget year to ascertain the reasonableness of the budget amount under current rates or conditions of use of service, and the monthly payment will be adjusted accordingly.

3.5 LATE PAYMENT CHARGE

A late payment charge of 1.0% of the unpaid balance will be added to the unpaid balance two working days after the date due. <u>Customers under the budget helper plan or a payment arrangement will be assessed a late</u> payment charge on the lesser of the outstanding scheduled payments or the outstanding account balance. All payments received will be credited against the oldest outstanding total account balance before application of the late payment charge. The late payment charge will be assessed as follows: waived in instances where a company error is involved or where complications arise with financial institutions in processing automatic electronic payments.

3.8 BILLING ADJUSTMENTS (Continued)

<u>Underbilled</u>

In the event the customer was underbilled, the Company, except as provided below for billing errors resulting from Meter Errors, may recalculate the bills for service during the period of the error, up to a maximum of six years from the date of payment.

<u>Overbilled</u>

In the event the customer was overbilled, the Company, except as provided below for billing errors resulting from Meter Errors, shall recalculate bills for errors resulting in overcharges up to a maximum of six years from the date of payment.

Meter Error

In the event the Company meter was found to be defective upon testing by request of the customer, the Company shall calculate the adjustment amount on the basis the metering equipment should be 100% accurate, in accordance with the rules prescribed by the Public Service Commission. The Company shall refund the customer any excess charges for incorrectly metered electric service for a period equal to one-half the time elapsed since the last previous meter test, but not to exceed six months. The Company may charge the customer for any deficiency in billing for incorrect metered electric service for a period equal to one-half the time elapsed since the last previous meter test, but not to exceed six months. Adjustments shall be based on actual monthly consumptions.

Meter Error due to Meter Registration Creep

In the event the Company meter was found to be defective upon testing, the Company shall calculate the rate of creeping for one-half the time elapsed since the last previous meter test, but not to exceed six months.

Meter Error Due to Partial or Complete Meter Failure

In the event the average meter error cannot be determined by a test because the Company meter failed either partially or completely, the Company shall use the check metering registration, if any, to estimate the quantity of energy used, or estimate the quantity of energy used on all available data. The Company shall advise the customer of the metering equipment failure and the basis for the estimated bill. Any adjustment shall be made from the discovery date of metering equipment failure, or if not known, for a period equal to one-half the time elapsed since the last previous meter test, but not to exceed six months.

Ν

(Continued on Sheet No. 6-16)

Date Filed:	06-30-09	By: David M. Sparby	Effective Date:
	President and CEO of North	nern States Power Company, a I	Minnesota corporation
Docket No.	EL09-		Order Date:

Section No. 6 Original Sheet No. 16

3.9 RETURNED CHECK CHARGE

There shall be a charge of \$15.00 for any check or draft submitted to the Company for payment which is dishonored or returned by the financial institution on which it is drawn.

3.10 ACCOUNT HISTORY CHARGE

There shall be a charge of \$4<u>5</u>.00 per account to the authorized requesting party for providing account history when such request involves 10 or more accounts, regardless of the type of account or number of meters.

3.11 SYNCHRONIZED BILL SERVICE

Customers billed under the Company's Synchronized Bill Service will receive one bill each month for either residential or commercial service. Such service will provide one or more monthly synchronized bills which combine all premises for a customer into selected multi-site account bill statements. Customers need make only one payment covering the total amount due for all the accounts included in each synchronized bill. The Company may, at its sole discretion, select the bill date of a synchronized bill, limit the number of accounts included in any one synchronized bill and exclude accounts based on rate class or type, amount of bill, account arrearages, bill date or participation in other programs. Accounts can be combined from more than one bill date resulting in a delay of the bill statement mailing for all accounts until the synchronized bill date is reached. Customers may revert to standard billing upon request. Customers may request modifications to how their accounts are set up under synchronized bill service.

Synchronized bill service is subject to the following conditions:

- A. The most restrictive bill due date provision for the accounts combined in the synchronized bill will be applied in the Company-approved bill date when the synchronized bill is issued.
- B. The Company shall not be liable for any customer costs which may result from any refusal, delays or failure to provide synchronized bill service when requested, for synchronized bill account changes.
- C. Customers using synchronized bill service agree Company may modify at its option the meter reading date of all accounts on the synchronized bill to a single read date where Company has installed automatic meter reading facilities at such customer's service locations. The meter read date shall not revert to the prior read date except at the Company's discretion.

Original <u>1st Revised</u> Sheet No. 17 Relocated from SDPUC No. 1<u>Cancelling</u> 5-10<u>17</u> Original Sheet No.

SECTION 4 USE OF SERVICE RULES

4.1 USE OF SERVICE

A. Definitions

- 1. *Individual Company Metering*. Direct measurement by the Company, using a Company meter, of all electrical consumption of a customer supplied by Company.
- 2. <u>Master Metering or Redistribution</u>. The provision of unmetered electrical supply by a customer to customer's tenants or other occupant, or to any person who qualifies for unmetered service.
- 3. Submetering. The provision of metered electrical supply through a customer owned meter to a customer's tenants, cooperative or condominium owners, other occupants, or to a portion of the customer's own electrical consumption.
- 4. *Outside Sale<u>Resale</u>*. The sale or provision of electrical supply by a customer to any other person outside the customer's building or property.
- 5. Series Subtractive Metering. An arrangement to measure consumption in a multiple occupancy unit building using individual Company meters on each occupancy unit in series with one Company master meter to measure total building consumption on the set of service entrance conductors or feeder supplying the individual occupancy units with billing for common area usage determined by Company formula.
- 6. *Building.* A self-contained complete structure, including movable and temporary structures separated by space or an area separation wall (as defined in the Uniform Building Code) from all other structures. Two or more structures shall not be considered a single building merely by the existence of skyways, tunnels, common heating or cooling facilities, common garages, entry halls or elevators, or other attachments.
- 7. *Occupancy Unit.* A room, office, apartment, or other space separated by walls or partitions that enclose the area, or a contiguous grouping thereof when occupied by a single customer.

Т

Т

The electric service equipment and associated building wiring of buildings must be arranged by the owner to facilitate individual Company metering of the electrical consumption of each building and occupancy unit, except where specifically permitted by Section 4.1, USE OF SERVICE, Paragraphs (C) and (D). If desired by the owner, I the Company will install and maintain necessary individual Company meters to measure consumption and render bills on the applicable rate schedules to each customer and separately occupied buildings and occupancy unit.

Electric service may be used only for the purposes set forth in the respective rate schedules. Within its assigned service area, the Company is in the business of providing retail electricity to the ultimate

consumer. Electricity is supplied for use by customer's household or business and outside sale resale or

submetering of such service is not permitted. The Company permits master metering where allowed by

law, but a landlord may not charge the tenants more than the landlord is charged by the Company.

The Company will not install, operate, maintain, or acquire any series metering system. The Company may, however, require series subtractive metering for its own purposes to measure consumption and render bills for electric energy not otherwise measured.

Electricity is normally supplied to each separate customer through a single service and meter. The Company does not engage in the practice of doing interior wiring on customer's premises except for the installation and maintenance of its own property. The customer may combine the supply of electricity through one meter and one service to two or more buildings or occupancy units if they are located on the same or contiguous parcels of property and occupied by the same customer solely for customer's own use. If separate buildings are occupied in whole or part by tenants of the customer, then each tenant occupied building, or area, or occupancy unit must be segregated from other loads of the customer and metered by the Company.

Section No. 6

Original <u>1st Revised</u> Sheet No. 19

Relocated from SDPUC No. 1Cancelling 5-1119 Original Sheet No.

4.1 USE OF SERVICE (Continued)

B. General Rules (Continued)

If more than one building with tenants, or portions of more than one building with tenants, are served through one meter, this practice may continue until such time <u>as the building is substantially remodeled</u> <u>oras material structural there are</u> changes are made that will result in substantial remodeling or renovation to the customer's service entrance that allow for individual metering. If such modifications remodeling does occur, provisions must be made to allow for individual Company metering of each tenant occupied building, or area, or occupancy unit. While the single meter service continues, the bill for the buildings will be computed as though each building or area or occupancy unit used an equal portion of the total metered service and was separately billed. If more than one building with tenants, or portions of more than one building with tenants, were served through one meter prior to February 1, 1984, and the bills were computed by a different procedure, that procedure practice may continue until such time as <u>the building is substantially remodeled or there are changes major modifications are made</u> to the <u>customer's service</u> entrance oquipment that allow for individual metering. At that time, the above provision for individual metering will apply.

C. Permitted RedistributionMaster Metering

Notwithstanding the general rules above, master metering is permitted by hotels, motels, dormitories, nursing homes, homes for elderly, or similar facilities, or by low income rental housing in which the cost of electricity is included in the rent and where the amount of the rental payment is based upon the tenant's ability to pay. In addition, the customer of a new or substantially remodeled building may petition the Commission for approval of master metering of electric service.

C.Notwithstanding the general rules above, electrical service may be purchased by an owner or single lessee for redistribution to tenants or other persons located on the same or contiguous parcels of land, for the following uses:-

1.Residential multiple occupancy buildings of only two occupancy units, one of which is occupied by the building owner.

2.Hospitals, nursing homes, hotels and motels, dormitories, campgrounds, and other facilities where the occupancy is of a purely transitory nature.

3.Floor space occupied without enclosure by walls or partitions such as department store concessions, shopping center kiosks, cigar stands, and exhibition hall booths.

4.Areas used primarily for storage.

Section No. 6

Original <u>1st Revised</u> Sheet No. 20 Relocated from SDPUC No. 1<u>Cancelling</u> 5-1220 Original Sheet No.

4.2 CUSTOMER'S WIRING, EQUIPMENT, AND PROPERTY

All wiring and equipment on customer's side of the point of connection, except metering equipment, will be furnished, installed, and maintained at the customer's expense in a manner approved by the public authorities having jurisdiction over the same.

Customer will protect all electrical equipment and systems with devices that conform to the industry accepted standard for the various classes of electrical equipment and systems to prevent fire or damage to equipment from electrical disturbances or fault occurring in the customer's system or in the supplying system. The "industry accepted standard" will be as required in the National Electrical Code and such additional devices as are prescribed by any public authority with jurisdiction over the installation of electrical facilities.

Any inspection of a customer's wiring and equipment by the Company is for the purpose of avoiding unnecessary interruptions of service to its customers or damage to its property and for no other purpose, and will not be construed to impose any liability upon the Company to a customer or any other person by reason thereof. In addition, the Company will not be liable or responsible for any loss, injury, or damage that may result from the use of or defects in a customer's wiring or equipment.

The Company may, however, at any time require a customer to make such changes in <u>his-customer's</u> electrical or non-electrical property or use thereof as may be necessary to eliminate any hazardous condition or any adverse affect which the operation of the customer's property or equipment may have <u>onen_said customer</u>, <u>other customers of the Company</u>, the public, or the Company's employees, equipment, or service. In lieu of changes by the customer, the Company may require reimbursement from the customer for the cost incurred by the Company in alleviating an adverse effect on the Company's facilities caused by the customer's property.

The transformers, service conductors, meters, and appurtenances used in furnishing electric service to a customer have a definite capacity. Therefore, no material increase in load or equipment will be made without first making arrangements with the Company for the additional electric supply.

SECTION 5 STANDARD INSTALLATION AND EXTENSION RULES

5.1 STANDARD INSTALLATION

A. Service at Secondary and Primary Voltage

Secondary voltage service is defined as single or three phase alternating current from 208 volts up to but not including 2,400 volts. Primary distribution voltage service is defined as three phase alternating current from 2,400 volts up to but not including 69,000 volts.

The Company will provide permanent service at the standard voltage and phase available in the area to the service location designated by the Company. The Company will not be required to provide overhead service in an area serviced by an underground distribution system. If requested by the Company, the customer shall execute an agreement or service form pertaining to the installation, operation, and maintenance of the facilities. Payments required under Section 5, STANDARD INSTALLATION AND EXTENSION RULES, will be made on a non-refundable basis and may be required in advance of construction unless other arrangements are agreed to in writing by the Company. The facilities installed by the Company shall be the property of the Company, and any payment by customer will not entitle him-the customer to any ownership interest or rights therein.

A customer, unless otherwise stipulated in the applicable agreement or service form, <u>is requiredand</u>-prior to any installation by the Company, <u>the customer is required</u> to provide the necessary right-of-way for the installation of the Company's facilities and to have the property developed so that the Company's facilities will be installed in a permanent location and can be installed without any delays caused by the customer.

For purposes under Section 5, STANDARD INSTALLATION AND EXTENSION RULES, the Company's costs are all direct and indirect expenses, including material, labor, overheads, and applicable taxes, incurred by the Company due to such an installation as determined by allocations under the Company's usual accounting methods.

The Company will install, own, and maintain on an individual project basis the distribution facilities necessary to provide permanent service. The customer will be required to pay, in addition to the applicable rate, the following amounts, if applicable, to the Company:

Τ

5.1 STANDARD INSTALLATION (Continued)

Β. Service at Transmission Voltage

Transmission voltage service is defined as three phase alternating current at 69,000 volts or higher. The availability of transmission voltage will be determined by the Company when requested by the customer. The service voltage available will vary depending on the voltage in the vicinity of the customer's service location. A customer electing to take transmission service for any portion of his-the customer's service will be considered a transmission service customer and any additional Company investments at the customer's location whether secondary, primary, or transmission voltage will be considered as special facilities.

Transmission voltage service will be provided under the following conditions:

- 1. Such service does not adversely affect the reliability of the rest of the system or cast an undue expense on other ratepayers.
- 2. The customer will be metered at the lowest utilization voltage. Meter readings will be adjusted to compensate for transformer losses so as to be the equivalent of metering at the service delivery voltage.
- The customer will be responsible for converting his equipment to a higher voltage in the future if the 3. Company must do so to carry higher loads over existing lines.
- 4. If in order to serve the customer, part of a transmission line extension must be built on property other than that owned by the customer, the whole line serving the customer will be built, owned, maintained, and operated by the Company. The customer will be responsible for reimbursing the Company for all expenses due to the acquisition of rights-of-way and permits on lines that the Company constructs. If the line extension is entirely on the customer's property, the customer may build, own, maintain, and operate it or request the Company to do so at the expense of the customer.
- 5. The customer must allow the Company access to all Company owned equipment for maintenance or emergencies. The customer's maintenance records for protective equipment must also be available to the Company for inspection.
- 6. The Company will not use condemnation procedures to acquire rights-of-way to provide transmission service if the customer can be served adequately and economically at primary voltage.

Section No. 6

Original <u>1st Revised</u> Sheet No. 26 Relocated from SDPUC No. 1<u>Cancelling</u> 5-1526 Original Sheet No.

5.1 STANDARD INSTALLATION (Continued)

B. Service at Transmission Voltage (Continued)

The requesting customer will be responsible for reimbursing the Company for all costs associated with required new or relocated transmission lines or extensions, changes to the distribution system, and substation modifications. If the customer requests the Company to remove existing facilities, the customer will be charged the replacement cost less depreciation, less salvage, plus removal expense. If facilities are specifically installed for more than one customer requesting transmission service, the cost will be shared by the customers requesting this service. The customer shall execute an Electric Service Agreement specifying the appropriate charges. Payment shall be made in the form of a monthly facility charge. An optional one-time charge is available upon customer request.

5.2 GENERAL EXTENSION

Subject to its Section 5, STANDARD INSTALLATION AND EXTENSION RULES, the Company will extend, enlarge, or change its distribution or other facilities for supplying electric service when the product of three and one half (3.5) times the anticipated annual revenue, excluding the portion of the revenue representing fuel-cost recovery from the sale of additional service to result therefrom is such as to justify the expenditure. When the expenditure is not so justified, the extension, enlargement, or change of facilities will be made only if the customer, at the Company's option:

- A. Pays to the Company the portion of the capital expenditure not justified by the <u>product of three and one</u> <u>half (3.5) times the</u> anticipated annual revenue, <u>excluding the portion of the revenue representing fuel-cost</u> <u>recovery</u> (with or without provision for refund of all or part of such payment),
- B. Agrees to pay a special monthly charge,
- C. Agrees to pay annually a specified minimum charge, or
- D. Agrees to a combination of the above methods.

In determining whether the expenditure is so justified, the Company will take into consideration the total cost of serving the applicant and will apply the general principle that the rendering of service to the applicant will not cast an undue burden on other customers. The Company's Section 5, STANDARD INSTALLATION AND EXTENSION RULES, imposes charges on customers for certain installation costs.

Northern States Power Company<u>, a Minnesota corporation</u> Minneapolis, Minnesota 55401 SOUTH DAKOTA ELECTRIC RATE BOOK - SDPUC NO. 2

GENERAL RULES AND REGULATIONS (Continued)

Section	No.	6
---------	-----	---

Original <u>1st Revised</u> Sheet No. 27 Relocated from SDPUC No. 1<u>Cancelling</u> 5-15 & Original Sheet No. 5-15.1<u>2</u>

5.2 GENERAL EXTENSION (Continued)

Non-Rrefundable payments will be in the amount determined by subtracting from the total estimated installation cost the product of three and one half (3.5) times the anticipated annual revenue, excluding the portion of the revenue representing fuel-cost recovery adjusted by the revenue factor, as set forth in Section 5.1, STANDARD INSTALLATION. Additional refundable payments may be required where service is extended and where customer occupancy is expected to be delayed. In such cases, Efor each additional customer served directly from the original contracted extension within five years from the date of its completion, the person who made the advance payment will receive proportionate refunds as additional customers take occupancy. based on the revenue to be received from the additional customer served from the extension and the costs required to serve such customer. The total of such refunds will in no event exceed the total refundable advance payment. Refunds will be made only for line extensions on private property to a single customer served directly from the original contracted facilities.

5.3 SPECIAL FACILITIES

When requested by the customer, the Company will provide, if practicable, service through special facilities not normally provided under Section 5.1, STANDARD INSTALLATION. Common examples of special facilities are duplicate service facilities, special switching equipment, special service voltage, three phase service where single phase is adequate, excess capacity, capacity for intermittent equipment, trailer park distribution systems, underground installations to wood poles and other special undergrounding, and relocation or replacement of existing Company facilities. Charges will be made for such service in accordance with this rule.

The customer will execute an agreement or service form pertaining to the installation, operation, and maintenance of the facilities. Payments required will be made on a non-refundable basis and may be required in advance of construction unless other arrangements are agreed to in writing by the Company. The facilities installed by the Company shall be the property of the Company. Any payment by a customer will not entitle him-the customer to any ownership interest or rights therein.

Payment for special facilities may be required by either of the following methods, or a combination of these methods, as prescribed by the Company:

- A. A single charge for the costs incurred or to be incurred by the Company due to such a special installation, or
- B. A monthly charge of one-twelfth of the Company's annual fixed cost, plus cost of maintenance to provide such a special installation. The monthly charge will be discontinued if the special requested facilities are removed or if the customer eventually qualifies for the originally requested special facilities.

Section No. 6

Original <u>1st Revised</u> Sheet No. 29 Relocated from SDPUC No. 1<u>Cancelling</u> 5-1629 Original Sheet No.

5.5 REPLACEMENT OF OVERHEAD WITH UNDERGROUND

A. General

The Company will replace its overhead facilities with underground facilities upon the request of a customer, a group of customers, or upon lawful order of a municipality. The benefited customers will be charged the value of the undepreciated life of the overhead facilities being removed and removal costs, less salvage, plus the additional cost, if any, incurred by the Company in installing its underground distribution system, including distribution laterals and service laterals, instead of an equivalent overhead system. In addition, payment for each service lateral will be charged in accordance with Section 5.1, STANDARD INSTALLATION. At the customer's expense, Tthe customer, at his expense, must engage an electrician to convert or adapt his the customer's electrical facilities to accept service from the underground facilities to be installed. The Company will not remove its existing overhead service to a customer until after a period of time reasonably adequate for the customer to make the necessary alterations in his the customer's electrical facilities.

B. Urban Renewal

In an urban renewal area wherein 75% or more of the buildings in each block are being demolished, and undergrounding of electric lines is required either by the urban renewal plan or by ordinance, the Company will place underground, at its own expense, only that portion of its overhead facilities (excluding distribution and service laterals) that distribute power from main feeder lines to serve new and existing buildings within the renewal area. Main feeder lines or transmission lines that pass through an urban renewal area and serve other areas will be relocated or undergrounded only if the requesting party arranges to pay such costs. Each customer will be charged by the Company for the installation of necessary underground distribution lateral or service lateral to the extent required in the Company's Section 5.1, STANDARD INSTALLATION. At the customer's expense, Tthe customer, at his expense, must engage an electrician to convert or adapt his the customer's electrical facilities to accept service from the underground facilities to be installed. The Company will not remove its existing overhead service to an undemolished building until after a period of time reasonably adequate for the customers to make the necessary alterations in their electrical facilities to accept underground service.

D. <u>Customer Requirements</u>

The following installation and conditions will be required of the customer:

- Secondary Voltage Service supplied from an underground distribution lateral installation will require that the customer install, own, and maintain necessary conduits and secondary service conductors or bus duct to a point designated by Company within or adjacent to the secondary compartment of the transformer or vault. Company will make final connection of customer's secondary service conductors or bus duct to Company's facilities.
- 2. Secondary Voltage Service supplied from underground secondary service conductors may require that the customer install, own, and maintain necessary conduits on private property to a point designated by the Company at or near the property line. The secondary service conductors usually will be installed by the customer in his conduit; however, in some installations it may be preferred to have the Company provide a continuous installation from Company facilities through the customer conduit to his service equipment. In these installations, the customer must pay the total installed cost of the Company's cable installed on private property. The Company will make the final connection of the customer's secondary service connectors to the Company's facilities.
- 3. The customer will be subject to any charges imposed as a result of the conditions set forth in parts (B) and (C) under Section 5.1, STANDARD INSTALLATION.

5.6 SERVICE CONNECTIONS

The customer, without expense to the Company, will grant the Company right-of-way on <u>his-the customer's</u> premises for the installation and maintenance of the necessary distribution lines, service conductors and appurtenances, and will provide and maintain on the premises, at a location satisfactory to the Company, proper space for the Company's transformers, metering equipment, and appurtenances.

The service conductors as installed by the Company from the distribution line to the point of connection with the customer's service entrance conductors will be the Company's property and will be maintained by the Company at its own expense.

The customer will provide for the safekeeping of the Company's meters and other facilities and reimburse the Company for the cost of any alterations to the Company's lines, meters, or other facilities necessitated by customer and for any loss or damage to the Company's property located on the premises. The exception is

5.7 TEMPORARY SERVICE

The following special requirement is prescribed to govern temporary service:

A customer taking temporary service (less than five years) will pay the rate applicable to the class of service rendered and will pay in advance the Company's calculated cost, figured on a time and material basis, of the installation and removal of the facilities, including the meter required to furnish the desired service, less the salvage value of such facilities.

The Company may require the customer to make an advance payment sufficient to cover the estimated cost of service as described above.

SECTION 6 CURTAILMENT OR INTERRUPTION OF SERVICE

6.1 REFUSAL OR DISCONTINUANCE OF SERVICE

With notice, the Company may refuse, discontinue, or curtail electric service for any of the following reasons: failure to pay amounts payable when due; failure to meet the Company's deposit or credit requirements; breach of contract for service; failure to provide Company with reasonable access to its property or equipment; failure to make proper application for service; failure to comply with the other provisions of the Company's rates, rules, and regulations on file with the Public Utilities Commission; when Company is unable to furnish electric service to customer because it cannot obtain permits, wiring affidavits, or necessary rights-of-way; when necessary to comply with any order or request of any governmental authority having jurisdiction.

Upon such notice as is reasonable under the circumstances, the Company may temporarily discontinue electric service when necessary to make repairs, replacements, or changes in the Company's equipment or facilities.

Without notice, the Company may disconnect electric service to any customer: (1) for unauthorized use or if the customer has tampered with the Company's equipment; or (2) in the event a condition appears to be hazardous to the customer, to other customers, to the Company's equipment, or to the public. Any discontinuance of electric service will not relieve the customer from customer's obligations to the Company

Without notice the Company may refuse, discontinue, or curtail electric service for any of the following reasons: unauthorized diversion of electricity or use of or tampering with the Company's equipment; when necessary to make repairs, replacements, or changes in the Company's equipment; in the event of a condition determined to be hazardous to the customer, other customers of the Company, the public, or the Company's employees, equipment, or service. Any discontinuance of supply will not relieve the customer from his obligations to the Company.

Section No. 6

Original <u>1st Revised</u> Sheet No. 34 Relocated from SDPUC No. 1<u>Cancelling</u> 5-19<u>34</u> Original Sheet No.

These are not the entire list of reasons for refusal or discontinuance of service, but are also subject to South Dakota Public Utilities Commission's rules, each reason by itself is sufficient to provoke refusal or discontinuance of service.

6.2 CURTAILMENT OR INTERRUPTION OF SUPPLY

Without notice, Company may curtail or interrupt service to any or all of its customers when, in its judgment, such curtailment or interruption will tend to prevent or alleviate a threat to the integrity of its power supply. In such event, the judgment of the Company will be deemed conclusive on all parties involved. The selection by the Company of the customers to be curtailed or interrupted will also be conclusive on all parties concerned, and the Company will be under no liability for any such curtailment or interruption. Any curtailment or interruption of supply will not relieve the customer from his its obligations to the Company.

TIME OF DELIVERY ENERGY SERVICE RATE CODE E52	Section No. <u>6th-7th</u> Revised Sheet No. Canceling 5th-<u>6th</u>Revised Sheet No.	3
AVAILABILITY Available to any small qualifying facility (SQF).		

RATE Metering Charge for Single Phase Service per Month	\$4.75
Payment Schedule for Energy Delivered to Company On Peak Energy Payment per kWh Off Peak Energy Payment per kWh	\$0.0519 \$0.0314
Capacity Payment for Firm Power per On Peak kWh	\$0.0120

FUEL CLAUSE

Payments subject to the adjustment provided for in Fuel Clause Rider.

DETERMINATION OF FIRM POWER

The SQF will have supplied firm power if during the billing period an on peak capacity factor of at least 65% was achieved. The calculation of the on peak capacity factor will be as follows:

The average on peak period metered capacity delivered to the Company for the on peak period of the billing period divided by the greatest 15 minute metered capacity delivered for the on peak period of the same billing period expressed in percent and rounded to the nearest whole percent. If the percent calculated is 65 or greater, capacity payment will be made. If the percent calculated is less than 65, capacity payment will not be made.

TERMS AND CONDITIONS OF SERVICE

- Electric service provided by Company to customer at the same site shall be billed in accordance with the 1 appropriate retail electric tariff.
- 2. The minimum contracted term of service is 12 months.
- 3. Interconnection charges will be assessed by the Company on an individual basis for all costs associated with addition to or modification of Company facilities to accommodate the SQF. The monthly metering charge recovers the cost of the additional metering equipment and the associated billing, operating, and maintenance expenses. The net interconnection charge recovers those costs incurred for equipment and expenses in excess of metering equipment and expenses. At the option of the SQF, the net interconnection charge will be a single payment or will be a monthly payment. The calculations of such charges are described in Subdivision 1, DEFINITIONS, in this section.
