RE: Brookings County – Lyon County Second Circuit Installation – Construction Start

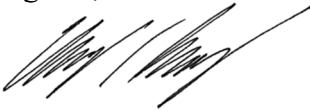

Dear Landowner:

Xcel Energy, its agent and contractors, will be installing the second circuit on the 345kV transmission line located between the Brookings County Substation and the Lyon County Substation (BOK-LYC). Construction activities in South Dakota are scheduled to begin on May 6, 2024.

The second circuit will be installed on the open davit arms on the existing structures. Installation will be completed using helicopters and ground-based equipment. Construction matting will be installed at wire pulling locations and additional areas, as necessary.

Enclosed is a map showing the Brookings to Lyon County section. Construction crews may need to be on your property as they work. If crews are on your property, they will exercise all reasonable efforts to minimize any impact to your property. If your property is damaged as a result of the construction, Xcel Energy will pay for the repair and restoration of the damaged area. Please contact me at (612) 330-6471 with any questions or concerns. Thank you in advance for your assistance in this project.

Regards,

Chris Berglund
