<b><u>Revenue Lag Days</u></b>	
Computer Billing	33.62
Manual Billing	33.62
Late Payment	0.00
Connect and Trouble Charges	33.62
Rentals	(11.29)
Interchange Revenues	38.21
Sales for Resale	41.06
Production Associated Revenues	41.06
Midwest Independent System Operators ("MISO")	14.00
Point to Point - Non-Firm	41.06
Services and Facilities	41.06
Ancillary Service Revenues	41.06
Distribution Associated Revenues	33.62
Other	33.62
Joint Operating Agreement - Revenue fr/to PSCO	41.06
<b><u>Payment Lead Days</u></b>	
Coal and Rail Transport	18.10
Gas for Generation	37.01
Oil	19.40
Nuclear and End of Life	0.00
Nuclear Disposal	76.13
Purchased Power	33.09
Interchange	38.21
Labor and Related Costs	
Regular Payroll	11.89
Incentive Compensation	252.18
Pension and Benefits	16.80
All Other Operating Expenses	29.21
Property Taxes	355.99
Employer's Payroll Taxes	28.44
Gross Earnings (Franchise Fees) Taxes	
Electric	N/A
Gas	N/A
Federal Income Taxes	36.75
State Income Taxes	36.75
State Sales Taxes on Customer Billings-Minnesota	28.99
State Sales Taxes on Customer Billings-North Dakota	44.94
State Sales Taxes on Customer Billings-South Dakota	43.45
Number of Days in the Year	365

## Lead Lag Study

A lead lag study is a widely used and acceptable method for developing the Cash Working Capital ("CWC") component of rate base in connection with the determination of revenue requirements in public utility rate case proceedings.

The underlying objective of a Lead Lag Study is to measure the average length of time between the utility's provision of service and subsequent payment by customers ("Revenue Lag"), and the incurrence of costs necessary for the provision of utility services and subsequent payment by the utility ("Payment Lead"). A Lead Lag Study does not produce the calculated CWC allowance. The result of the Lead Lag Study provides the revenue lag days and various payment lead days that are used in the Cost of Service Study model to calculate the CWC provision. Total CWC is the sum of the net working capital required or provided for each includible element of cost of service.

The expense factors are calculated with this formula:

$$\text{Test Year Expense Amount} \times \frac{(\text{Composite Revenue Lag} \text{ minus } \text{Applicable Payment Lead})}{365 \text{ days}}$$

The CWC factor is applied to the appropriate test year expense amount. A positive result indicates a CWC requirement. A negative result indicates, on average, cash is received from customers before Northern States Power Company ("NSP") must pay for the applicable expense. A negative CWC result represents a non-investor source of capital. The CWC results of each appropriate expense are added together. This total CWC requirement (positive or negative) is included in rate base. A positive CWC requirement is added to rate base, a negative CWC requirement is deducted from rate base.

To complete a lead lag study, a twelve-month time period is used. Revenue receipts and payment disbursements are analyzed. All NSP jurisdictions include cash expenses. The cash expenses are placed in categories such as gas purchased for resale, labor, property and payroll taxes, and operating and maintenance ("O&M") expenses. Some jurisdictions that NSP operates in include some non-cash expense categories in the calculation of CWC such as Depreciation, Nuclear Fuel Amortization, Deferred Income Taxes, and Interest Expense.

Total NSP(MN)

Interchange Revenue

Northern States Power Company d/b/a Xcel Energy  
(MN) Company Utility – Minnesota, North Dakota and South Dakota Jurisdictions  
Cash Working Capital Lead / Lag Study

The Midwest Independent System Operator (MISO) Day 2 tariff operating procedures that became effective April 2005 altered the operation of the electric transmission grid considerably. The revenue lag for sales for resale was computed using amounts billed January through June 2005 to give some reflection to the MISO Day 2 tariff change. This information was the latest available at the time the case was being prepared. These billings covered usage for December 2004 through May 2005. January 2005 billings are for the month of December and so forth. Any billings for months prior to December 2004 were excluded. All billings, which could be matched to a receipt, were included in the analysis. The revenue lag is the dollar weighted average of the January through June 2005 billings.

Wholesale Revenues

NSP provides power and energy under FERC tariff to full-requirements municipalities without their own generating capability. Wholesale accounts receivable for January through June 2005 that covered billings for December 2004 through May 2005 usage, were reviewed to give recognition to the MISO Day 2 tariff change that became effective April 2005. This information was the latest available at the time the case was being prepared. Any billings for months prior to December 2004 were excluded. All billings, which could be matched to a receipt, were included in the analysis. The revenue lag is the dollar weighted average of the January through June billings.

Revenues from NSP(W) - Gas

NSP(MN) has a Gas Coordinating Agreement with NSP(W) for supervisory control and data acquisition (“SCADA”) services provided to assist NSP(W) managing its Wisconsin and Michigan gas distribution systems. Under the contract, billings are made as soon as practical after month-end, with payment due by the twentieth of the following month. The average revenue lag of 35.21 days was computed by adding the twenty-day payment term to the fixed 15.21 service lag.

Revenues from NSP(W) – Electric Interchange Agreement

NSP(MN) Company operates its Power Supply facilities as an integrated electric system. Energy and Power are provided under a FERC-approved Interchange Agreement between

Northern States Power Company d/b/a Xcel Energy  
(MN) Company Utility – Minnesota, North Dakota and South Dakota Jurisdictions  
Cash Working Capital Lead / Lag Study

NSP(MN) Company, NSP(W) and Lake Superior Power Co., initially dated September 17, 1984. Under the existing arrangement, approximately fifteen percent (15%) of the power generated by NSP(MN) is transmitted to MNS(W), and approximately eighty five percent (85%) of the power generated by NSP(W) is transmitted to NSP(MN). Such amounts are reflected in the NSP(MN) Company statement of net operating income as both operating revenues [power sales to NSP(W)] and Production Expenses [power purchases from NSP(W)].

Under Article X of the Agreement, the party selling power is to be compensated by the purchaser for full fixed costs, including a return on investment, plus the variable costs of production and transmission. Charges for demand and energy are to be billed monthly. As soon as practical after each month-end, a statement setting forth the detail of current charges is prepared and submitted for payment. The Interchange Agreement requires that payment shall be made within ten days of the date of the statement. Affirmation by Jim Schroeder, the person responsible for administering the NSP(MN) side of the Interchange Agreement, based on the time required to accumulate interchange transactions data, prepare and issue the monthly statement and process payment requests, the nominal payment date is the 23rd of the month. In actuality, a single inter-company settlement payment netting amounts due to/due from both companies is made at that time. Accordingly, the same average number of day computed for the revenue lag applicable to power sales to NSP(W) will also apply to that portion of Purchased Power Expense relating to receipts from NSP(W).

Such calculation is as follows:

$$\frac{365 \text{ days}}{12 \text{ months} \times 2} + 23 \text{ days} = 38.21 \text{ days}$$

Revenues from Natural Gas Transportation

Generally, all contracts for gas transportation are based on a calendar service month. The service lag is computed as 15.21 days (365 days divided by 12 monthly service periods times one-half). Billings for transportation services are generated by the third working day. Payment is due fifteen days after billing. The average revenue lag of 33.21 days was computed by adding the 15.21 days service lag, 3 day billing lag, and the 15-day payment lag.

Effective in 2006, it is corporate policy to pay all state estimated income tax payments in four installments. The installments follow the Federal estimated income tax payments. Payments are made on the 15th day of the 4th, 6th, 9th and 12th months of the tax year. If any date falls on a Saturday, Sunday, or legal holiday, the installment is due on the next regular business day.
