Docket EL13-024

Sioux Valley Southwestern Electric Cooperative (SVE) and Otter Tail Power Company agree to the exception to the SVE service territory permitting Otter Tail Power Company to provide electric service to Randy Carper Farms. SVE's nearest three-phase facilities are approximately 16,500 feet from the customer. Otter Tail Power Company's closest three phase facilities are approximately 1,300 feet from the Carper property, thus making it more economical for Otter Tail Power Company to serve the property.
