

1/26/15

To whom it may concern:
Regarding Black Hills Power's
request for another rate increase.
Every rate increase should
include agreements that follow
a long term energy policy
that encourages/Requires clean
energy from all sources (including
individuals with solar and
wind supplies).

Because the majority of the people
who are expected to pay for the
sixth rate increase in nine
years have not seen pay raises
that keep up with inflation,
there should be better balance
in the welfare of customers
and shareholders.

Sincerely,

Carol Merwin
