

Otter Tail Power Company is installing a required new air-quality control system at Big Stone Plant to reduce emissions of sulfur dioxide and nitrogen oxides based on a Best Available Retrofit Technology determination adopted by the South Dakota Department of Environmental and Natural Resources. We're also installing new pollution-control equipment at Hoot Lake Plant to comply with the Mercury and Air Toxics Standards required by April 2015. To recover costs associated with these projects, the South Dakota Public Utilities Commission approved an Environmental Cost Recovery Rider (ECRR). Beginning November 1, 2014, the ECRR will be reflected on your bill as a separate line item. The rate for all classes of services is \$0.00487 per kwh. For more information contact Customer Service at 800-257-4044 or place an inquiry from our web site at www.otpco.com.
