Subject: RE: OTTER TAIL, EL14-082
Auto forwarded by a Rule

Hi and again thanks for your reply.

When determining the rate percent increase for Ottertail did the PUC consider using part of Ottertails profit to pay for some of the costs of the upgrade instead of them shifting the entire cost to their customers?

Was length of time to recover Ottertails cost for the upgrade used in determining the rate percentage increase and if so what was that length of time? If there was a length of time used when that time is up will the PUC automatically review Ottertails rates for adjustment downward?

Thanks

Dick
