

OTTER TAIL POWER COMPANY
Docket No: EL15-016

Response to: SD Public Utilities Commission
Analyst: Darren Kearney
Date Received: 06/10/2015
Date Due: 06/24/2015
Date of Response: 06/24/2015
Responding Witness: Jason A. Grenier, Manager Market Planning - (218) 739-8639

Information Request:

On Page 16 of the 2014 Status Report, is the statement "...with summer peak demand savings of 17.44 kW per unit installed" correct?

Attachments: 0

Response:

The total number of commercial participants in the 2014 Geothermal Heat Pump program was ten. The total summer kW savings was 17.438 kW as indicated in the table on page 16 of the 2014 Status Report. The 17.438 kW should be divided by the ten participants. The statement should read "...with summer peak demand savings of 1.744 kW per unit installed." The decimal point was incorrectly placed by Otter Tail.
