Subject: [EXT] Con Edison hearing-Davison County

PUC,

I listened to the August 1st PUC Hearing recording (<http://puc.sd.gov/commission/media/2017/puc08012017.mp3>). At the 2:04 mark, the Davison County Project is discussed. Con Edison Attorney Michael Luda discusses a long list of accomplishments, to include "a local Conditional Use Permit has been received". At the 2:30 mark, the Commission resumes and Michael Luda makes a statement of correction that Corey Juhl wanted the Commission to know "the Davison County Conditional Use Permit process is under way, and not completed". The Commission already had this question ready for Con Edison.

We have received complaints from Davison County residents about how this project is being presented to the PUC. I have attached the Board of Adjustment minutes from the February 2, 2016 Conditional Use Application hearing. The BOA voted 4-1 to deny the permit, and have not made any indication this proposal would be reconsidered.

If you have any questions, please let me know.

Jeff Bathke

Director of Planning & Zoning and Emergency Management

Davison County
