

MidAmerican Energy Company
Transmission Cost Recovery (TCR)

MidAmerican Energy Company, as a load-serving member of the Midcontinent Independent System Operator (MISO), is assessed costs related to regional transmission facilities that benefit customers throughout the Midwest. The South Dakota Public Utilities Commission has approved an increase in the TCR rate driven by increases in the regional transmission costs assessed to MidAmerican Energy. The rate change, effective with April 2016 bills, will increase the TCR to \$0.00173/kWh from its current rate of \$0.00097/kWh. This rate is shown as a separate line item on your bill.

The chart below illustrates the bill impacts of the change in the TCR rate.
