Re: Point of Electrical Service Exception, Davison County

Dear: Mr. and Mrs. Miiller

The purpose of this letter is confirm with you we agree to allow Central Electric Cooperative to provide a single phase electrical service for the ~1500 square foot home that will be placed in the SE quarter of section 4, T101N, R60W, ~500' east of the half mile line. The exact point of service is the only location NorthWestern Energy agrees to release for what has been communicated as the Robbie Miiller home site as described above.

The closest distribution line we could extend from to the home site location is ~2.5 miles away. The cost of extending single phase service to this location for the load of a single home would result in a large contribution to aid the construction. We also understand Central Electric's facilities are much closer and should result in more reasonable costs.

Thank you. If you should have any questions or need additional information please contact me.

Sincerely,

Craig Fergen

Construction Manager – Southern Division, NorthWestern Energy
