I am in favor of the Wind Farm.  
It is something great for the Community  
and our country.

To me it does not hurt the scenery  
and does not take up land space,  
only sky space. I don't see in any  
hurt. It is power production and  
our country needs that.

I don't know why people would be  
against it. I am for it, and  
would like to see the benefits to  
Clark County for this to happen.

Thank you  
Ted Wicks
