

BLACK HILLS POWER, INC.  
d/b/a BLACK HILLS ENERGY  
EL17-026

REQUEST DATE : 06/29/17

RESPONSE DATE : 07/18/17

REQUESTING PARTY: Staff

---

**SDPUC Request No. 1.8:**

Refer to Exhibit B, Measure Inputs sheet.

- a) Justify inclusion of the C&I Prescriptive measures with a forecasted TRC of less than 1.0. Explain the benefit of including measures in the C&I program that are not cost-effective.
- b) Are there any adjustments the Company can make to these measures to make them cost effective?

**Response to SDPUC Request No. 1.8:**

- a) Installing these non-cost effective measures in a retrofit project that includes cost effective measures makes sense for the customer. As an example, while a customer is installing the LED lights and fixtures, the customer is also installing the occupancy sensors further increasing the efficiency of the building.
- b) No, there are no adjustments the Company can make that would push them over the cost effective threshold.
