Roads were left in good shape. The spots have been fixed that needed to be. Thanks Troy Mudgett

Hi Troy,

As we discussed on the phone, the Crocker Wind Farm would like to return to the state and close out our road bond, but before we do I just want to confirm with you that we've addressed any concerns with the Woodland townships roads that arose during construction. Please let me know your thoughts, thank you and have a good day.

Hello James,

I have looked at the 418<sup>th</sup> Ave and it looks good.

Darin Dunlavy

Hi Darin,

As you and I had previously discussed, we contracted Aaron Bjerke's crew to add gravel on the two thin spots of 418<sup>th</sup> Ave. We would like to close out our road bond with the state and want to ensure that we've lived up to your expectations on the township roads. Please let me know your thoughts. Thank you!

Can't seem to get an email to return so I'll text. The road concerns were addressed and everything is in good shape

Tue, Jun 29, 9:04 AM

Thank you Sir

Hi Fred, Thanks so much for your feedback regarding Ash township and sorry for taking so long to get back to you.

When I reached out to you, I also reached out to Loren Olsen in Spring Valley and Troy Mudgett in Woodland township (as well as Darin Dunlavy in Warren) and they all confirmed that we have restored the roads in their respective townships to at least as good of a condition as the roads were in prior to the start of construction. We, of course, will repair any future damage that we cause to the roads with our operations, but outside of that, any routine maintenance or repairs should be coordinated with the respective townships.

Thanks again.

Hi James,

I have traveled on 162<sup>nd</sup> Street and in Ash Township, I believe, the areas of concern to me were covered with adequate gravel.

However, I think there are still a couple of places on 162<sup>nd</sup> Street in Woodland Township that are still in need of more. There are also a couple of spots on 419<sup>th</sup> Avenue between 161<sup>st</sup> Street and the entrance to the I-Line in Woodland and Spring Valley townships. With the weather being so dry, those areas don't show up until we have a significant amount of rain. Then they become a mess. If you would like to have me point them out to you I would make myself available.

Fred Obermeier

**Subject:** Crocker Wind Farm - Township Roads

Hi Fred / Steve

We recently had Aaron Bjerke's crew add gravel to the thin spots on 162<sup>nd</sup> St from the east of the J-line access lane all the way to 419<sup>th</sup> Ave. I'm hoping you can confirm that this fulfills the punch-list item we had at the end of construction to add gravel on that road.

We would like to close out our road bond with the state and want to ensure that we've lived up to your expectations on the township roads. Please let me know your thoughts. Thank you!
