Hi Jean,

One of our regional staff visited the nest and indeed there was an adult sitting. Thank you for making us aware of this nest.

Good morning, Jean,

I've contacted our regional staff and they will be going out to the location you provided; thank you. We do not have this nest in our records.

Regards,

Silka

Subject: [EXT] Active eagle nest

On or about 22 March we were checking to see if an eagle nest was on your list and if it was "active". We have since driven by the nest 3 times and each time we have seen one or both eagles. On the second visit we took a cellphone picture of an eagle in the nest.

FYI the nest is approx two miles from the Crocker wind farm boundary. The coordinates are: 45°00'20.24N 97°42'36.50W

I'll attach a pic from the cellphone; sorry it isn't a better quality.

Sincerely,

Jean Stevens
