

Turbine Flexibility Proposal

- **Requested Turbine Flexibility:** Ability to adjust turbines within 1,000 feet of locations proposed in Application without further approval, subject to the following limitations:
 - Applicable setback requirements are met;
 - Specified noise and shadow flicker thresholds at occupied residences are not exceeded;
 - Cultural resources and sensitive species habitat are avoided; and
 - Wetland impacts are avoided to the extent practicable.
- **Material Changes:** Any turbine adjustments that do not comply with the limitations set forth above would be considered “material changes,” and Crocker will file a motion seeking Commission approval prior to making the adjustment pursuant to the following approval process:
 - Crocker would file with the Commission and serve on the official Service List a motion for approval of the adjustment that includes:
 - An affidavit describing the proposed turbine adjustment, the reason for the adjustment, the reason the adjustment does not comply with one or more turbine flexibility limitations set forth above, and information regarding compliance with all other applicable requirements; and
 - A map showing both the approved location and the proposed adjustment (in different colors).
 - Once received, the information would be reviewed by Commission Staff, and Commission Staff would have 5 business days within which to request further Commission review.
 - If no further review is requested, then Applicant may proceed with the adjustment.
 - If further review is requested, the Commission would then issue a decision regarding Applicant’s request at its next regularly scheduled Commission meeting after the request for further review is made by Commission Staff.
