**Subject:** Crocker Wind Farm

Mr. Paulson,

This email is in response to your email regarding NRCS easements. It is the responsibility of each individual landowner that has an NRCS easement to ensure they follow the requirements of the easement. If Crocker Wind Farm needs to change a turbine location greater than 325 feet as a result of not being able to site a turbine on NRCS easement land, they will need to submit that request for Commission review and approval in accordance with the permit. At this time, we have not had any such requests from Crocker.

Sincerely,

Darren
