Subject: [EXT] Dakota Range Wind Project

Nick Johnson

[REDACTED] Baltic SD 57003

I oppose this wind project because it makes me not want to move home. I was born and raised in two miles north of Waverly and lived there until I graduated high school in Waverly. I then went on to South Dakota State University and received a bachelor's degree in civil engineering. I dated and married a girl from South Shore and we moved near Sioux Falls in order to find work. We have always had plans to move back to the Waverly / South Shore area to begin our family, but from the placement of these windmills we have decided that we will not move back to the area if the windmills arrive.

I strongly oppose this wind project and would never choose to live near windmills of this type.

Thanks
