Subject: [EXT] Prevailing Winds Fine

Ms Fiegen, I'm not sure you will remember me, but I testified in October of last year before your commission. I am pleased that you took the step of fining Prevailing Winds for their dishonesty but at the same time I'm not surprised by their actions! This is why I put myself in the position of speaking up to these dishonest dealings! This is not an isolated incident and these violations are common in the industry and will certainly continue! Unless you have someone do constant oversight and hold them accountable you have granted them a open deal to do as they please! In my personal experience there is very little that can be done to enforce any kind of accountability as to exceeding sound dBa and other violations. Unfortunately this is what happens when revenue trumps the health, safety, and welfare of us who are forced to live with these truly torturous turbines! Thank you, Vickie May
