To whom it may concern:

I received notice that the state of South Dakota is considering allowing these wind turbines through Rural Harvest to be installed in South Dakota. I am a land owner. I think its pathetic to even think of these terrible wind turbines & all to be installed anywhere in So. Dak. I do NOT want to see ANY of these on or NEAR my land. To think of what you are considering doing to this beautiful farm land - how it would affect the appearance, the wild life, the farmers - where will the grain be grown when there are all over the land?

Its rude and an insult to even think that you people in office would even considering having this project go thru. It makes one wonder what background one has and why this would be proposed.

Please keep these turbines off my land, out of Rural County and out of South Dakota.

Lila Bulygo
Land owner.
