WEATHERFORD, Okla. (KOKH) — A wind turbine caught fire, causing a grass fire Wednesday in western Oklahoma.

Oklahoma Forestry Services reports that on March 28 a wind turbine two miles south of Weatherford caught fire, throwing sparks to the ground.

The sparks caused a grass fire that was contained after growing to approximately five acres. Eight fire engines responded to the scene and were able to contain the fire.

ARLINGTON, Ore. — A wind turbine caught fire Thursday, sparking a 2,000-acre wildfire, according to the North Gilliam Rural Fire Protection District.

The turbine was on Rattlesnake Road and, according to firefighters, the fire jumped Highway 19, closing the road.

Firefighters got the fire out but not before two railroad bridges were burned.

No evacuations were needed.
