EL18-026

please post

You guys are so pitifully dishonest. You're sorry for our "frustration and anger". The letter was about headaches, earaches, anxiety, pulsating ear pressure. In addition to a house we can't sell. But you would never want to admit that those things existed. You're an expert at parsing your words very carefully, but it doesn't work anymore. The commission is obviously in the tank for Big Wind. If you don't have the guts to do what is right, you should all resign.
