Subject: latest filing for sPower concerning early start

Hi, Kristen,

Just for your information, 296th street and South Dakota Highway 46 do not intersect within the Prevailing Wind Park footprint, so the photo submitted by P. Pawlowski looking southeast from said intersection cannot be accurate. sPower still doesn't even know where they are at! Also, as many of our roads are impossible to traverse, we have been forced to travel on the road where this construction is taking place and there was considerable dirt work already done on Thursday April 18th as opposed to the reported Monday April 22nd. Can't trust them. Shall I send this to Patricia Van Gerpen?

Regards,
Sherm Fuerniss
