

Ms. Van Gerpen,

In addition to my comments to Kristen Edwards on the morning of April 26 (see attachment) before the correction of the apology concerning the location cited by Prevailing Wind Park, LLC's early start letter and my own witnessing of earth work having been done already on Thursday, April 18, I have since been informed by neighbors living closer to the site and traveling that road much more frequently than I that a dozer was present on the site April 13 and that tree and shrub removal began on or about April 15 and 16. Work apparently began as much as two full weeks before the authorized start date. Will there be any sort of response to this activity from the PUC?
