Re: Notice for Start of Construction
Dakota Range III, LLC
Dakota Range III Wind Farm and 345 Kilovolt (“kV”) Transmission Line

Dear Landowner:

Dakota Range III, LLC (“Dakota Range III”) plans to commence construction of the Dakota Range III Wind Farm and associated 345 kV Transmission Line (“Project”) in Grant County and Roberts County, South Dakota, as early as October 8, 2019. Enclosed for your information, please find the following Project-related documents:

1. A copy of the February 22, 2019 Order Granting Joint Motion for Approval of Settlement Stipulation and Granting Permits to Construct Facilities issued by the South Dakota Public Utilities Commission (“Commission”) to Dakota Range III for the Project and the approved Settlement Stipulation.

Dakota Range III has entered into an agreement with Wanzek Construction, Inc. (“Wanzek”), who will be constructing the Project. In addition, Dakota Range III will have an on-site representative, who will oversee Project construction in cooperation with Wanzek.

For your safety and the safety of the workers on the Project, we thank you in advance for your cooperation in the following safety practices:

- **Turbine worksites:** The Project involves many individual worksites. These worksites will involve heavy equipment and many moving parts. Please do not enter the worksites, either while workers are present or while workers are not present. We ask that you obey all warning signs and do not enter coned or taped off areas.
- **Road worksites:** The Project includes improving some roadways and working alongside the road. When workers are present, please reduce speeds to 30 mph or less and obey all warning signs. Watch for flaggers, who may occasionally slow or stop traffic. Be prepared for altered traffic patterns. While we will do our best to reduce temporary road closures, some may be required to protect workers and the public.
- **Wide truck loads:** The Project involves transporting large machinery, equipment and materials. Please follow all warning signs and watch for the escort vehicles. While the wide truck loads will do their best to keep traffic flow as normal as possible, they may take some turns slowly or take up more than their side of the road.

We expect you may have questions as construction approaches and commences. Please direct your questions to Nick Knezevich, who can be reached at:

Email: nick.knezevich@engie.com
Phone: (720) 873-5893

Nick Knezevich understands the construction process and would be happy to answer your questions.

Additionally, the Consumer Affairs Division of the Public Utilities Commission is a point of contact for any concerns that may arise from the Project. For your information, the Commission's address, phone number and website are as follows:

Public Utilities Commission
Capitol Building, 1st Floor
500 E. Capitol Ave.
Pierre, SD 57501-5070
Phone: (605) 773-3201
Website: puc.sd.gov

We look forward to working with you during and after construction of the Project.

Sincerely,

The Dakota Range III, LLC Team
