

My name is Colin Bronson and I am a landowner in Grant County. I have had a good working relationship with the team from Apex over the past few years.

We have been trying to get wind development in our area for the last 15 years.

I feel it would be an economic benefit to our local school, townships, businesses and county. This project would also create local technical jobs in the area.

We would like to have the opportunity to finally put the wind to good use and get the approval for the Dakota Range III project.

Thank you. Wilmot, SD
