

Hi, my name is Wanda Lau. Watertown, SD

My family owns land in Grant County in the Dakota Range project area. I'm a huge supporter of this project.

If you are wondering about support from this community, there are 85,000 acres under lease by Apex Clean Energy which is the equivalent to 400 landowners with 17,000 acres signed in this project.

Over the course of this project \$14,000,000 in tax revenue will be generated for the state, townships, county, and schools.

I know that Apex is doing the right thing. They have built good relationships with the Game, Fish & Parks, Sisseton-Wahpeton Tribe, the Townships, Cities, & Schools.

*wonderful
They're a group of
hard working
that
be...*

We hear talk about renewable energy and trying to clean up our air and lower CO2 emissions. The way to do that is right in front of us.

We've come too far to disappoint this community that has worked so hard to make this finely come to fruition. Let's not turn back now.

APEX is here today - Our opportunity is here today! if may be gone tomorrow

I would like to ask the PUC Commission to approve the permit for Dakota Range 3.
