RESPONSE OF AMBER CHRISTENSON

March 26, 2021

While examining the documents for the upcoming April 1st Commission review of the Motion by Crowned Ridge Wind for Approval of Mitigation Plan, I notice the plot graphs submitted by Crowned Ridge on March 3, 2021, were only for Locations 1, 2 and 3. I request the same style of plot graphs be generated and submitted for the remaining locations 4, 5 and 6, so that I, and the Commission, can review and compare all locations in the same manner, apples to apples, so to speak.

Thank you in advance for providing these other three Plot graphs in a timely manner.

Sincerely,

/s/Amber Christenson
