**AFFIDAVIT OF
TYLER WILHELM**

1. I am the Senior Project Developer for Crowned Ridge Wind, LLC (“CRW”). I am familiar with the setbacks required of the CRW wind Project. I am also aware that turbines CR1-89, CR1-90, CR1-91, and CR1-97 are at a 90-meter hub height. All Crowned Ridge Wind turbine locations were modeled and measured for the state, county, and federal setback distances at a 90-meter hub height, including locations originally using a wind turbine with an 80-meter hub height. Therefore, turbines CR1-89, CR1-90, CR1-91, and CR1-97 have been compliant with all the applicable state, county, and federal, setbacks related to distance as set forth in Section 13 of the Crowned Ridge Wind Application starting on page 74 since the filing of the Application.
