Ms. Christenson,

Public Liaison Officer Brian Riniker reached out to Crowned Ridge's senior construction manager and the county highway superintendent to discuss the road condition concern. It is PUC staff's understanding that the plan is to temporarily patch the areas of concern with gravel and install signage to inform drivers of the road condition until frost conditions are conducive to permanently repairing the road. Mr. Riniker will be contacting you directly to further discuss the plan to repair the roads.

If you have any further or future concerns regarding road conditions, please feel free to contact Mr. Riniker.
