Dear Chris Nelson,

I am writing to voice my support for wind energy development. South Dakota is a national leader in wind power and we are perfectly situated to benefit from wind energy development. Wind energy adds needed jobs and pays millions in property taxes to help locally-including our schools and roads.

This is our opportunity to be a part of the future, to grow our economy, improve counties and support clean alternative energy options. Please do what you can to support wind energy.

Sincerely,
Tim OConnor
