Pierre, SD 57501-5070

Re: Docket No. EL19-003
Application to the SD PUC for a Facility Permit to Construct
A 300 Megawatt Wind Facility

Dear Ms. Van Gerpen:

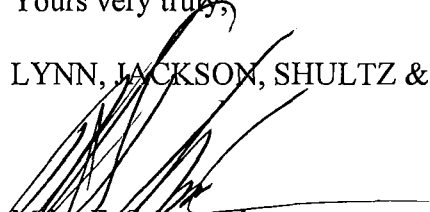

As directed by the Commission in its January 9, 2020 Order in Docket No. EL19-003, Crowned Ridge Wind submits its first monthly progress report explaining the status of low noise edge tailing edge attachments (LNTE).

Crowned Ridge Wind has coordinated with its contractors on the installation of LNTE attachments. Based on expected weather in April, Crowned Ridge Wind expects its contractors to start the installation of the LNTEs during the first half of April. Crowned Ridge Wind will use four to six crews to install the LNTEs. Each crew will be comprised of three workers. At this time, Crowned Ridge Wind does not anticipate that concerns with the coronavirus will impact the installation of LNTEs. In the event there is an impact on the installation of LNTEs from restrictions on work and travel related to the coronavirus, Crowned Ridge Wind will notify the Commission.

If you have any questions, please contact me.

Yours very truly,

LYNN, JACKSON, SHULTZ & LEBRUN, P.C.
