UTILITY COMMISSION

RE: Triple H Wind Project

To Whom It May Concern:

When working with Engie, they have always been up front and available for any questions or concerns regarding the "Triple H" Wind Project". They may not be here in person everyday but they are only a phone call or email away. If they do not answer right away they get back to you within a day.

Knowing the wind turbines are going to be all around our farm we have talked with land owners who have wind turbines on their farms and land owners who have them right next to their property but are not benefiting from them. We have been told by both parties that the wind turbines did not affect their daily lives.

We feel as landowners and residents of Hyde County that wind turbines are one of the cleanest forms of supplemental income that is available to our county. The revenue that our city and county will see from these turbines will be very substantial.

With the information gathered from Engie and the guidelines set by our local and state governments, we feel confident that as land owners we will be taken care of. We support Engie and the wind farm they are purposing to build in Hyde County.

Sincerely,

Ryan and Kristen Rittel
