South Dakota Public Utilities Commission,
PUC. Project Docket Number EL 19-007

Dear Sirs,

I am writing to voice my support for the construction of the Triple H Wind project. My opinion is that this project will add a stable economic gain for land owners, schools, cities and the State. New job opportunities will benefit the growth in rural communities.

All the resources are available to make the Triple H Wind project a success. Land owners are willing to make land available for wind energy production. Power companies want to connect it to the existing power grid and investors are willing to put many millions of dollars into producing clean sustainable energy.

This project is a win, win for almost everyone. Sincerely,

Debra Webb
