Subject: [EXT] Industrial Wind Turbine Noise and Shadow Flicker Trespass

Alcon,

My name is Steven Greber myself and my wife Mary Greber reside at 17165 468th Ave. Goodwin, SD. Deuel County, Rome Township. Our property and home are located west of Industrial Wind Turbine CR11 60 with the recorded set back of 2,041' feet.

At this time I wish to report and have put on record my report of violations of the amount of waste from Industrial Wind Turbine noise and shadow flicker that is being dumped upon our property and dwelling.

It is my understanding that Deuel County has decided that the Crown Ridge II Industrial Wind Turbines are permitted to trespass and dump their waste upon non-participant private property without easements, in the amounts of up to 45dBA, and trespass with shadow flicker up to (30) thirty hours per year.

Please see attached noise measurement reports, also please keep in mind that Industrial Wind Turbines produce more noise during the winter months when the air being disturbed is in a dense state.

We also have and continue to keep a video log of shadow flicker. We have records at least (10) ten hours of shadow flicker to date this year 2021. We have also recorded certain days that have in excess (30) thirty minutes per day. CR11 60 is positioned directly due east of our property and home.

I request that action be taken to rectify these violations of dumping and trespassing upon private property. I thank you for you time in regards to this matter.

Respectfully

Steven & Mary Greber
