

Exhibit B1, Lyon REC map of the area

Characteristics of the territory exception;

1. Sioux Valley Energy agrees that Lyon REC will provide all future single phase additions for this member or his successors at this location. The territory exception would be revisited if this member required three phase service at some point in the future.
2. Lyon REC has no required contribution in aid off construction for new permanent facilities, therefore, no contribution in aid of construction will be required. Sioux Valley Energy would require a CIAC of approximately \$4,600 for this service.
3. Lyon REC has a primary sectionalizing cabinet immediately south of 268th Street which will require approximately 150' to serve this new service. Sioux Valley Energy's closest electrical facilities are approximately 1,050 feet west of this new service.
