Subject: Electric Service Request

Jay,

I would like Douglas Electric to service my new 2,400 head hog finishing unit. The site of the barn is in Southeastern Electric's service area. Getting service to the site of my new hog barn will be shorter and easier to come from the current Douglas Electric service lines than to come from the Southeastern lines. Pulling underground lines from the east (Southeastern service) would require crossing a creek with various terrain. Coming from the west (Douglas Electric service) would be a flat pull. I would also like Douglas Electric to service this barn because our farm is also on Douglas Electric and we like the barn and the farm to be on the same service. Thank you.

Barn Address: 40432 271st Street Dimock, SD 57331

Mailing Address: 301 South Ben Street Parkston, SD 57366
