This went silent for a while. Please review the letters from Ken at Central. They appear to me to provide everything we need to proceed. Let me know if anything else is needed.

Craig,

Below is a copy of an email Central Electric received from Glen Lowrie requesting a service exception to provide electric service to a new drain tile pump. Attached is my letter acknowledging that Central Electric is willing to provide electric service to the new drain tile pump and requesting that Northwestern Energy seek approval by the SD Public Utilities Commission to proceed.

Please let me know if you have any questions or concerns regarding this request.

Subject: Power and transformer request
Brian

I am asking that Central Electric would bring power and set a transformer on my property located 1/4 mile west of the intersection of 409th Ave and 263rd St. It will be located on my side of the ROW. From the transformer I will bury a service line about 200 ft south where a 50 amp service will set. The power is needed to run the pump for a drain tile lift station. The pump is a 1 1/2 hp submersible controlled by a simple float switch.

I do have a deadline set by the Davison County Drainage Board of Oct. 20, 2019 to have everything completed and operational. Any expedition to get this completed is greatly appreciated.

Please let me know if you have any questions or need additional information.

Glen Lowrie
