1-2. Provide a list of all inputs and assumptions used in the model to determine the avoided energy costs. Also, provide the source/basis for each input/assumption and indicate any that are required by other jurisdictions. For any inputs/assumptions for which the source/basis is already described in the Informational Compliance Filing Required by 18 CFR 292.302, MidAmerican need not explain again, just simply note it is already provided in the filing.

Response: See Confidential Schedule 1-2 for the inputs and assumptions used to calculate the avoided energy costs for MidAmerican Energy Company. These same base inputs were used to calculate the avoided energy costs in Iowa and Illinois subject to the specific state's regulatory treatment of retail fuel costs.
