**Subject:** [EXT] Comment for EL21-011 BH Energy Cogeneration Tariff

Having just read an article on this proposal, and the proposal, and watching an unrelated article on SDPB where they interviewed Hunter Lovins of Natural Capitalism Resources. I **oppose** the passage of EL21-011. This hurts small businesses in South Dakota and makes companies like BHE (the only electrical company in my area) a protected monopoly in this area of South Dakota. I feel this is bad for everyone involved, except of course, BHE, who wants to eliminate all competition. The PUC must protect South Dakota residents from this kind of corruption.
