**Subject:** [EXT] Measure EL21-011

Hello,

My husband and I are residents of Spearfish, SD. We are both working professionals. We are writing to let you know that we are opposed to measure EL21-011. We live within the city limits of Spearfish and built a home in 2019 completely on the energy produced by the solar panels we had installed. We do not feel that this tariff change is beneficial or in the best interest of South Dakota for future home builders or businesses that would like to utilize solar for their energy needs. We feel this measure is under-handed and would be a step back in progressing South Dakota forward with alternative energy sources.

Thank you for your consideration in hearing our concern regarding this measure.
