Subject: Re: [EXT] Docket EL21-011

To whom it may concern:

Denying a homeowner the right to consume electrical energy created on their property with equipment they purchased with no help from Black Hills Energy is unfair and inappropriate. This seems to be a strategy to prohibit individuals from purchasing their own solar systems and is more like a dictatorship rule than a Democratic rule, which I am adamantly opposed to. I would like to know how to get continuous correspondence on this docket.
