Commissions,  
Sorry that I am unable to retrieve the data you requested.

Regarding my four skystream wind generators. I would like to share my experience with them with you. I had a huge misunderstanding about the metering, monthly billing and the credit processing. This turned a good plan into a 75 year payback on my investment not the 10 to 15 years I was led to believe. I have had at least two reductions in the rate for credit of power to the grid system. I think that my property tax has increased and the cost of insurance may put me in a negative cash flow. I have repaired all for turbines twice after the 5-year warranty and 25-year lifespan. I have one turbine that is in need of repair and can't justify the cost. If I have less return from Black Hills Power at more expense I will be forced to abandon this venture. my limited knowledge of the amendment has my question how I could possibly be billed for the power I produce for my own use. When right now it's knocking \$3 off my electric bill.
