**Subject:** RE: [EXT] EL21-011

Dear Commissioners:

Re: EL21-011,

B H Power's assault on individuals' rights to be fairly compensated for, and not punished for, on site power production contributions to our electrical grid are offense and counterproductive.

I ask that you reject their request to implement this onerous change, and make it clear that you find their arguments without basis in fact.

I hope, for you commissioners' sake, that our power grid isn't devastated by the same kind of recent ransomware attack that shut down the East coast pipeline.

For the public to know that this commission decided that centralized, vulnerable power production was sanctioned by this body, when reasonable alternatives had been laid in front of you.... Well, that will be the day you will wish you had a do-over. My opinion, only.

Thank you

Jerry Munson Life-long, born and raised South Dakotan
