Subject: [EXT] Comment on EL21-011 BH Energy Cogeneration Tariff

Dear PUC,

I wanted to write in opposition of this tariff proposed by a private for-profit company. Crony capitalism has no place in South Dakota and this is a prime example. Home owners have the right to produce their own energy. Government must justify why they would be taking something away from their constituents, not the other way around. Please keep SD as “free” as some are claiming it to be. Private companies being able to control utility costs in this capacity is dangerous and self serving. This would be an unnecessary and intrusive act to take away more freedoms from the people of SD.

Respectfully,

Kristi Myhrer
