Subject: [EXT] EL21-011

Dear board members:

On first hearing of Black Hills Energy's wish to sell everybody's home-generated energy back to them at full retail price (EL21-011), I could not believe the company's audacity.

This is not an appeal to technical issues but to justice. I hope you are morally grounded individuals and that BH's proposal will strike you the way it struck me: as plain theft. Please do not abet them.

Paul Sauser
