**Subject:** [EXT] Proposed Tariff on Solar Power

<https://www.keloland.com/news/investigates/proposal-puts-cloud-over-future-of-solar-energy-in-south-dakota/>

Is Black Hills Power actually trying to tax a private entity for power the private entity creates themselves? This has to be a joke. The guy in the video says it best. It would be the same as the grocery store taxing us for food we produce in our own gardens. This is absolutely crazy that the PUC would give this 2 seconds of thought to approve.
