**Subject:** [EXT] Renewable Energy

Good morning,

I wanted to state that the article I read regarding Black Hills Energy proposal for renewable energy should be found without merit. We need to encourage this not make it difficult and unrewarding. I have done much work in the solar and fuel cell industry nationwide and the direction BHE wants to take is simply wrong and greedy for them. BHE will be the only winner protecting their bottom line.

Please contact me if you have any questions or concerns.
